Dear Mr. Carter:

As one of the charter members and founders of the Air Power League, you will be interested, I know, in an advance copy of a report by Mr. Wilson which is being mailed to you today.

It is the most complete review of the League's activities yet published. Our fiscal status, our philosophy of organization, and our planned activities for 1946 are all dealt with in detail, for the initial period of organizing has come to an end and we have entered upon the long-range phase of League operations.

Probably you will find of greatest interest the plan evolved for community and state organization. This, I may say, took a great deal of trial and error. Our club program is a departure from our original thinking but it offers impressive possibilities which are already being realized in many parts of the country. We can anticipate a day when the League's local and state organizations will consist of hundreds of thousands of members, all actively taking part in air development, all vigorously supporting air power.

Another section of the report to which I call your particular notice is the description of the undertakings we hope to sponsor this year.

Your support of the League is earnestly appreciated and any suggestions on our future program or comments on this report that you may care to make will be most welcome.

Sincerely,

Howard W. Angus

Executive Vice President
