FRIDAY, JANUARY 15, 1960

8 PAGES

Pretty Miss Melissa Shepherd, Beaumont sophomore, will reign as TCU's Cowgirl Sweetheart at the Fort Worth Exposition and Rodeo Feb. 3. She was chosen for the honor by the TCU Rodeo Club.

## Rodeo Club Choice

# Beaumont Soph Is Cowgirl Sweetheart

By GEORGE RAINS

"We've got a real cowgirl sweetheart this year," said Aubrey Taylor, Fort Worth senior, president of the TCU Rodeo Club, as he announced that Miss Melissa Shepherd, Beaumont sophomore, has been elected Cowgirl Sweetheart.

"Melissa," he went on to say, "will represent the University on TCU Day, Feb. 3, at the Southwestern Exposition and Fat Stock Show, and will be presented at the afternoon rodeo performance."

Rodeos are nothing new for Melissa, who plans to ride her own quarterhorse, "Honey", at her presentation, for she has been participating in them since she was 13.

"Barrel racing and goat tying are my specialities," Melissa says. She has won awards in both divisions.

Melissa was named All-Round Cowgirl for three straight years in the South Texas Championship Youth Rodeo in Beaumont while she attended high school.

Also numbered in her awards, are Grand Champion at the Lake Charles Horse Show in 1958, where she topped her competition in four events, and All-Round Cowgirl at the National Intercollegiate Rodeo held at McMeese College, Lake Charles, La., last year.

Melissa, a transfer student from Lamar State College of Technology in Beaumont, has ridden in two rodeos this school year wearing the colors of the University and the Rodeo Club.

When asked how she did

against Tarleton State, she said, "Not so good, I hit a barrel and got a five second penalty, which made me come in third or fourth."

Melissa has a stable that would make most cowboys envious. Besides "Honey", she has two other horses, "Sonny" and "Albert". All three are quarter-horses.

"I ride 'Albert' when entered in cutting competition, but 'Sonny' is my favorite," Melissa said.

"I wish I could enter the rodeo here, but I don't have any way to get 'Honey' up here", she went on to say. She added, "but I'll be ready for the next rodeo, which will be sometime next month."

## Foundation Gives School \$25,000 for Renovation

The Stanley S. Kresge Foundation of Detroit, Mich., has made a contribution of \$25,000 to the project of renovating the old Administration Building, Chancellor M. E. Sadler has announced.

The check was presented on campus recently to Dr. O. James Sowell, executive director of development for the University, by K. D. Mason, manager of the Kresge store at 3037 S. Freeway here.

Work of completely remodeling the old building, constructed in 1910, is due to begin in 1960. At a cost of some \$800,000, it will be redone and air-conditioned as a classroom, laboratory and faculty office building.

# Budget Is Presented To Student Congress

By RUTH ANN KINDIGER

Congress Treasurer John Kollman, Taylor senior, introduced a performance budget to Student Congress Tuesday night. The new type of budget showed the original appropriation, the amount spent to date, what the money had been spent for and the amount that remained of the appropriation.

"I believe that this type of presentation will enable Congress members to see where the money of the Student Body has gone, as well as the amount that has been spent to date of the various appropriations," Kollman stated.

An old type financial report, showing how much had been spent by the various committees and activities and how much remained, also was included for quick and easy study.

The report showed that the Congress books are in balance as of Dec. 29, 1959.

Kollman noted that the general fund receipts of the first-semester income exceeded the expected amount by approximately \$350. This amount was credited to the general fund.

"The financial position of Congress is much better than I expected it to be at this time of the year. This is partially due to the income being above the budget estimation," he explained.

This new budget was another step taken by Congress to make itself a more smoothly-functioning body. In recent weeks it has completed a revision and modernization of the old constitution.

This proposed constitution was presented to the "Committee For Greater TCU" Tuesday afternoon by Kollman and Student Congress President Jerry Johnson, Arlington Heights, Ill. senior.

Johnson stressed the reason for presenting the constitution to the committee. He said, "You are not to pass on the constitution here. We want you to serve as a clarifying body, to take the constitution back to your various organizations, discuss it and bring any questions or ideas you might have back to the next Committee meeting."

He said the constitution would be put to a referendum vote the latter part of February or early March.

Kollman then explained to the group the reason for the proposed increase in the Student Body Fee.

"TCU has grown in recent years, therefore the expenses of the Activities Council have increased. Unfortunately, we have not been able to increase their budget appropriations due to our own limited budget. The 75-cent raise would increase our income from approximately \$9,000 to approximately \$15,000," he stated.

In his explanation, Kollman gave the group a comparison of the amount needed by the various Activities Council committees and the appropriations they received this year. In almost every case, the committees needed approximately twice the amount that was appropriated.

Kollman also compared the present Student Body Fee to fees in other Southwest Conference Schools. With the exception of Rice who replied that "our student body is quite a bit smaller than TCU's, and we don't need as much money," the fees were higher in every school.

## New Program Schedule Set For KTCU, Campus Station

KTCU, campus radio station, plans a programming revision, according to Mike Marshall, Fort Worth junior, station manager.

Beginning the first week of the spring semester, the station will broadcast between 4 and 9:45 p.m.

Currently KTCU broadcasts from 7 a.m. to 9:45 p.m.

The reason for the change is to improve the quality of broadcasts, according to Marshall.

"This can be done by concentrating our efforts on fewer broadcast hours."

Regular shows will still be news, music and sports. There

will be newscasts every hour and half-hour.

The varsity baseball games will be broadcast next semester as a special feature.

## BRUSH CRAFT?

Dr. James Vardaman, assistant professor of history, was lecturing to his medieval history class about the craft of spinners, dyers, weavers and fullers.

"What does a fuller do?" he asked the class.

"He makes brushes," was the reply.

## EXAM SCHEDULE

JANUARY 22-28, 1960

Class Hour	Examination Period	Date of Exam
8:00 MWF	8:00-10:00	Wed., Jan. 27
9:00 MWF	8:00-10:00	Mon., Jan. 25

3:30 TTh	1:30-3:30	Thurs., Jan. 28
4:00 TTh	1:30-3:30	Thurs., Jan. 28

**Called Project Talent**

# University Will Study Youth

The University will participate in a study of American youth known as Project Talent, in which over 500,000 high school students across the country will serve as subjects.

In March they will officially get the project under way by taking a two-day battery of tests designed to uncover their aptitudes, abilities and interests.

Dr. Saul B. Sells, professor of psychology, will head one of the regional coordinating centers and be responsible for collecting data from 12 North Texas school districts.

The test results for the first time will provide an inventory of human resources in the United States—how many potential scientists, doctors, street cleaners, teachers, soldiers or truck drivers there are among today's youth.

Follow-up studies of these same 500,000 people will be made at intervals for almost 25 years.

The study also should answer such questions as, what types of school or college—big or small, public or private—produce the most successful graduates in specific fields? How successful are guidance counselors? What does it take to become a good artist or scientist?

Project Talent is under the direction of Dr. John C. Flanagan, psychology professor at the University of Pittsburgh and President of the American Institute for Research. Preparations for the survey are largely financed so far by a \$500,000 grant from the United States Office of Education.

Five regional coordinators have been named, including Dr. Sells at TCU, with Dr. Winton H. Manning as assistant regional coordinator; Dr. Robert P. Anderson, Texas Tech; Dr. H. Paul Kelley,

University of Texas; Dr. Frank L. Stovall, University of Houston, and Dr. David F. Votaw Sr., San Marcos.

These regional coordinators will administer the programs locally, distributing the tests, arranging for cooperation of schools and serving as advisors on procedures.

The actual tests to be given in March include types ranging from "English: Effective Expression" to "Abstract Reasoning," "Mathematics" and "Creativity."

Each participant also will be asked to fill out questionnaires and data forms giving biographical information about himself and his family, listing his job and activity preferences and evaluating some of his less subtle personality traits such as neatness and leadership.

Twenty six tests will be given to each of the 500,000 subjects, with a resultant 13 million test papers.

Important results of the Project Talent survey will include an inventory of human resources; a set of standards for educational and psychological measurement; a comprehensive counseling guide indicating the patterns of aptitude and ability which are predictive of success in various careers; a better understanding of

how young people choose their work, and a better understanding of the educational experiences which prepare students for their life work.

## Brewer Will Head Business Fraternity

senior, has been elected to head Delta Sigma Pi, national business fraternity, for the coming semester.

Others elected to office were Lanham Atkinson, Fort Worth senior, senior vice president; Wayne Whittenburg, Fort Worth

sophomore, vice president; Dexter Thomas, Alpine junior, secretary; Ross Miller, Fort Worth junior, treasurer.

Also Wayne Allen, Fort Worth sophomore, historian; Howard Turney, Fort Worth junior, chancellor; and Jim Hembree, Fort Worth senior, Delta Sigma Pi correspondent.

## '60 CHEVY! ONLY WAY YOU CAN BUY A CAR FOR LESS IS TO BUY A LOT LESS CAR!

**THRIFTIEST 6 IN ANY FULL-SIZE CAR**—Chevy's Hi-Thrift 6 is the '60 version of the engine that got 22.38 miles per gallon in the latest Mobilgas Economy Run—more than any other full-size car.

**NEW ECONOMY TURBO-FIRE V8**—Here's a V8 with the "git" Chevy's famous for—plus a new economy-contoured camshaft and other refinements that get up to 10% more miles on a gallon of regular.

**EASIER-TO-LOAD LUGGAGE COMPARTMENT**—The trunk sill is lower and the lid opening is more than a foot and a half wider than Chevy's nearest competitor's. There's over 20% more usable space!\*

**MORE ROOM WHERE YOU WANT MORE ROOM**—Chevy's trimmed down transmission tunnel (25% smaller) gives you more foot room. You also get more head and hip room than in any other 2- or 4-door sedans in the field.

**WIDEST CHOICE OF POWER TEAMS**—A choice of 24 engine-transmission teams in all—to satisfy the most finicky driving foot. There are seven engines with output all the way up to 335 h.p. and five silk-smooth transmissions.

**EXTRA CONVENIENCES OF BODY BY FISHER**—No other car in Chevy's field gives you crank-operated ventipanes, Safety Plate Glass all around and dozens of other Fisher Body refinements.

**CHEVY SETS THE PACE WITH LOWER PRICES**—All Bel Air and Impala V8's are lower priced, as are many options. Example: a Bel Air V8 sedan with Turboglide, de luxe heater and push-button radio lists at \$65.30 less for '60.

**QUICKER STOPPING BRAKES**—Long-lived bonded-lining brakes with larger front-wheel cylinders for '60 give you quicker, surer stops with less pedal pressure.

**SOFTER, MORE SILENT RIDE**—Chevy's the only leading low-priced car that gentles the bumps with coil springs at all four wheels. Noise and vibration are filtered to the vanishing point by new body mounts.

**NOT CHANGE FOR CHANGE'S SAKE, BUT FOR YOURS**—There's only one person we consider when we make a change—and that's you. That's why we don't think you'll find anything more to your liking at anything like the price.

The more you look around the more you'll find to convince you that no other low-priced car has so much to show for your money as this new Chevrolet. Here's the kind of styling sophistication and subtle detail that only Fisher Body craftsmanship can create. Here's the kind of Full Coil comfort that neither of the other two leading low-

priced cars—and only some of the smoothest riding higher priced ones—build into their suspension systems. Here's more room inside (where you want it) without an inch more outside (where you don't want it). And with all these advances Chevy has managed to hold the price line! Your dealer will be delighted to fill you in on all the facts.

See The Dinah Shore Chevy Show in color Sundays NBC-TV—the Pat Boone Chevy Showroom weekly ABC-TV.

Now—fast delivery, favorable deals! See your local authorized Chevrolet dealer.

No Last-Minute Cramming

# Prof Suggests Study Hints

As finals approach, questions arise concerning the value of last minute "cramming".

Some believe that "cramming" only confuses the student. Those condemning this method of study are advocates of systematic, daily study, contrasted to the "crammers" who rely on a short, concentrated, last-minute effort.

Dr. J. T. Everett, professor of government, has made some helpful hints on method of study that

every serious student should consider.

Dr. Everett emphasizes that there is no substitution for daily study. "In accordance with University policy, a student should study two hours for every class hour, or six hours a week for a three hour course."

"This amount of study is sufficient for a solid C," Dr. Everett continued, "but an A or B student normally puts in more study time than the minimum."

"Text material should be read in paragraph units," Dr. Everett stated, "and the most important items of the paragraph should be marked in the margin."

"Class notes should be inte-

grated with text material," he stated, adding that successful study is a matter of practice.

"If a student has studied during the semester, he should go to a show or relax in some way the night before the exam," Dr. Everett explained. "The next morning, he should run over his classnotes and text notes to recall the issue."

## EDITORIAL COMMENT

### Mark Up Another One

A new year and a new decade officially appeared on the scene Jan. 1 when old man '59 quietly slipped away and young '60 noisily bounced in.

The past year saw many things happen in Frogland.

Sportswise, TCU started off 1959 right by winning the Southwest Conference Basketball crown and went on to the NCAA regional playoffs. Then when football season rolled around, the big Frogs did a repeat on their SWC Championship by seizing a share of first place with a three-way tie.

On the intellectual side came the announcement last spring that Ph.D's would be offered in physics and psychology beginning in September, 1960, thus deepening TCU's academic offerings.

The bright outlook for equally impressive accomplishments in the New Year was heightened Jan. 1 when TCU again won the SWC Sportsmanship trophy for 1959, which was presented at the New Year's Day Cotton Bowl game.

Whether additional sports and academic achievements will come this way in 1960 only time will tell.

TCU crystal ball gazers can predict one thing for certain, though.

Finals start one week from today.

### A Change for the Better

All semester there have been complaints about the parking system instituted this year whereby faculty and student parking has been segregated.

Editorials urged a reallocation of faculty spaces because too many were not being used while student drivers parked on all the side streets.

Last week Dean of Students Laurence C. Smith announced such a reallocation whereby students were allowed to park in some areas previously designated faculty only.

The change has definitely improved the parking situation on campus.

A new system such as this naturally had problems to be ironed out as first instituted.

We commend the Administration for their willingness to see that the system wasn't working well and to act accordingly.

### Avoid Repeat Performance

With the start of the spring semester only days away, it is not too soon for the seniors to start thinking about soliciting funds for their senior gift to the school.

The mistakes of last year's graduating class in failing to collect enough funds to pay for the gift should not be repeated.

Although the TCU marker on University Drive is an excellent addition to the campus, the seniors had to ask the Student Association to help them pay for it.

The class of '60 should do better.

## The Skiff

### THE LEDGER

## Disgrace at TCU?

By BETH MORRIS

Making an entry in The Ledger this week is Miss J'Nell Rogers, of the Skiff editorial staff.

Do most college students cheat when given the chance?

A recent Saturday Evening Post article entitled "American Disgrace: College Cheating" seems to think so. Author Jerome Ellison, a college professor, says that his investigations reveal that one student in three cheats "rather regularly."

If one-third cheat regularly, more than that do so when pressed to get in a difficult assignment.

The most prevalent type of cheating is copying others work, Ellison points out.

He implies that Greek files of past examinations, themes and lab notes are the system a lazy fraternity man uses to get through four years of college with the minimum effort.

Students often work so hard finding someone with a theme to copy that they could write it themselves much easier.

It is apparent to most people that cheating one's way through college is not conducive to much learning of subject matter. Few persons would like to be in the hands of a surgeon who cheated his way through medical school or be the client of a lawyer who got through college on the work of others.

The moral standards in American education have reached a new low. When even a Columbia University professor will cheat on the answers, what can one expect of students?

The old saying "They're only hurting themselves when they cheat," is not true. In college classes where many grades are given on the "curve" basis, the cheater hurts others in the class as well.

Students aren't solely responsible for the lamentable condition which exists in American colleges today. Lenient profs who close their eyes and turn their backs on "crib sheets" are as guilty as the dishonest students. They are "aiding and abetting" to put it in modern legal lingo.

An overload of assignments also is bad. When even good students find that they can't get the work in, they sometimes will cheat to do so.

A stricter approach to dishonest scholastic practices by University officials might help eliminate the idea in the minds of students that cheating is actually not very bad because "everybody does it."

It is to this group of students who have been lured into dishonesty in hopes of group approval or because of a fear of speaking out against it, to which this editorial appeals.

Until the wrongness of cheating can be impressed upon college students, it won't stop at TCU or anywhere else. Nor will an honor system work. How can it if students have no honor?

## SW Campus Confidential

By JACK HARKRIDER

### TEXAS—

A short article in the Daily Texan came from the United Press International wire service and told of the plight of a small city:

"A strange, influenza-type sickness has brought social and business life in Linden, Tenn., to a standstill. Authorities have closed the country's nine public schools to protect youngsters, the movie house has locked its doors, and the town's main industry—an apparel firm—has shut down. The virus disease has struck sots."

Yes, we've suffered the same disease ourselves. It's commonly known as sobering up.

The fair town of Austin is proud of their artificial "moons", according to a feature article in the Daily Texan:

"Weather or not, Austin has moonlight.

"About 96,000 lumens of it per tower, per night.

"And there are 27 165-foot 'moon' towers scattered throughout Austin which are lighted 365 nights a year (plus one extra this leap year).

"Constructed of wrought and cast iron, work was begun on the towers during the 'Roaring 90's' and May 6, 1895, they were put into operation. Since that time some of the towers have been shifted from one location to another to produce light where it is needed the most.

"Whether it's snow, monsoon, cloudy, or what the weather, Austin has moonshine . . . which has made Austin known as a lover's paradise."

It's gratifying to know Austin has moonshine. Remember the old saying about love: "Candy's dandy, but liquor's quicker."

★

### TECH—

Often, headlines take on a different meaning than was intended for the story. For example, the Toreador ran a story on Adm. H. G. Rickover, head of the Navy's nuclear power department, who was appearing on campus. The headline read:

"Atom Man to Speak Here Wednesday."

We assume the next speaker on the program will be Superman.

The Toreador also told the plight of a young Tech-san girl who was late coming to the dorm:

"A green young freshman lass, finding herself late at the dorm one evening, decided to be quite sneaky and crawl in an open first floor window.

"Cautiously she pushed the window up and climbed in. Upon turning around, she found herself right in the middle of a meeting . . . a meeting of the dormitory legislature."

Now that's getting into politics the hard way.

On Three Floors

# Library Contains 315,000 Volumes

Three floors of nothing but books, periodicals, pamphlets and newspapers may be found in the modern cream-colored brick Mary Coutts Burnett Library.

Located on the east side of the campus, the red roofed building has vertical, mobile louvers on its south and west sides.

The Library, which houses over 315,000 volumes, is a relatively new addition to the campus, being dedicated only last March.

The original Mary Coutts Bur-

nett Library was built in 1925 with \$150,000 donated by Mrs. Burnett for that purpose. In 1958 the building was remodeled and enlarged to over twice its former size at a cost of \$1,300,000. The present structure is that of the enlarged building.

Approximately 25 student assistants work 16 or 17 hours a week to aid the regular staff members to serve students using the Library.

Among the special features of

the Library is a special room housing the William Luther Lewis Collection. This rare collection contains over 900 first editions, important manuscripts and autograph letters in English and American literature. The collection is valued at approximately \$500,000. It has been loaned to the University indefinitely by the Amon G. Carter Foundation.

More than 1,200 periodicals are available to students in the periodicals room just across from the check out desk.

The Library subscribes to many daily newspapers. Besides the Fort Worth papers, one may find the "Dallas Morning News", "The Christian Science Monitor", "The

Wall Street Journal", and "The New York Times". Older editions of "The New York Times" are on microfilm and are available to all students.

★ HISTORICAL NOTE

Dr. W. J. Hammond, chairman of the department of history, was mayor of the city of Fort Worth from 1937-38.

Cadets Are Admitted to Carswell

Twice the speed of sound is the flight capacity for the Strategic Air Command's newest bomber, the B-58, which the AF ROTC cadets saw last Friday.

Convair, the only producer of the B-58, admitted 50 cadets to view its assembly line. Only military personnel are allowed with-

in Convair's gates, and no cameras are permitted.

The trip was arranged by Major Phillips for the Air Science I Class, and all cadets were invited. This was the first view of the production of the Air Force's latest planes for most of the cadets.

UNIVERSITY OF HAWAII

1960 SUMMER SESSION  
58 DAYS \$529 Plus \$9.00 Tax  
TOUR PRICE—ONLY

THE ORIGINAL COLLEGE TOUR TO HAWAII

Price includes steamship travel to Hawaii, return to West Coast via scheduled airlines, living accommodations, and all major sightseeing drives on Oahu — Circle Island, Mt. Tantalus, Koko Head, Pearl Harbor, and City Tour. It also includes an extensive beach program — a catamaran cruise, outrigger canoe rides, glass bottom boat excursions, and a visit to the aquarium. Social events highlight the tour. These include introduction parties where new friends are met, welcome dinner and floor show at Hawaiian Village Tapa Room, fashion show dinner at Reef Hotel, a special "Night in Japan" party, formal dinner dance and floor show at Royal Hawaiian Hotel, and farewell "luau" native feast at Queen's Surf — to all which events military officers and college men are invited. Beach dressing rooms and lockers are provided, major movies weekly, tips, transfers, and many other extras are also covered by tour price. Roundtrip steamship travel is available at adjusted tour rates.

HOWARD TOURS TWELFTH ANNUAL

1. WILCOX HALL, CAMPUS RESIDENCE: This is Hawaii's original college tour. It is an educational social program requiring University of Hawaii summer session enrollment. For college girls only. Tour price as indicated above.

2. APARTMENT RESIDENCE AT WAIKIKI: Residence is in beach hotel apartments at Waikiki. Includes complete hotel service, plus kitchen facilities, daily maid service, etc. University enrollment is optional. Separate tour units for college girls, young school teachers, and other adults. Tour price only \$569 plus \$10 tax.

Study in Mexico Slated

# Dr. Crow Heads Session

A summer session at Monterrey Institute of Technology will be sponsored July 16 through Aug. 26.

Dr. George Crow, Spanish professor here and former director of the American Binational Cultural Center at Bogota, Columbia, will supervise TCU's tenth consecutive summer session in Mexico.

The summer program will provide students an opportunity for extensive study of the Spanish language and literature as well as the chance to acquire an overall understanding of Mexico—its people, customs, institutions and culture—both in the classroom and through meeting Mexican students, professors and townspeople.

Courses will be offered in art and folklore, economics, geography, history and sociology. A student may earn six semester hours of college credit.

The session will cost \$260, which includes tuition, board and lodging, medical care, laundry and room service, and organized tours and excursions. High school graduates and college students are eligible to join the TCU group.

Monterrey Tech is fully accredited by the Southern Association of Colleges and Secondary Schools and is approved by the Texas Education Agency. Veterans may enroll under the GI Bill.

Additional information and application forms may be obtained from Dr. George Crow, department of foreign languages.

**\*HISTORICAL NOTE**

In 1929 the tuition fee at TCU was raised from \$75 to \$100 a semester.

## Music Instructors Will Be Judges

Miss Arlene Sollenberger, instructor in voice, and Tully Mosely, instructor in piano, from the department of music, were selected as judges for the Oklahoma Music Teachers Association to audition voice and piano college students on Jan. 9 and high school students on Jan. 10 at the University of Oklahoma in Norman.

The first group of winners will appear in the state convention in March and one from the high school group will appear on the program of Southwestern Division of Music Teachers National Association at Little Rock, Ark. in February.

## SAME SPECIES?

In describing a Rotifer to his freshman biology class, Dr. John Forsythe, professor of biology, said, "At times it is motionless, contracted and to all appearances dead."

"You know, that description fits several freshman students I know," he added.

LUCKY STRIKE presents

# Dear Dr. Frood:

## MARRYING FOR MONEY—IS FROOD IN FAVOR?

(see below)

**Dear Dr. Frood:** The other day I stopped at my boy friend's house unexpectedly and I found Lucky Strike butts with lipstick on them in the ash tray. What should I do?  
*Observant*

**Dear Observant:** Go ahead and smoke them. A little lipstick won't hurt you.

**Dear Dr. Frood:** I am a 267-pound tackle on the football team, cleanup hitter on the baseball team, champion shot-putter and captain of the basketball team. Where can I find a job when I graduate?  
*Athletically Inclined*

**Dear Athletically Inclined:** Look in the Want Ads under "Boy—strong."

**Dear Dr. Frood:** Recently, while collecting ants, I happened upon this strange creature in the woods. I enclose a sketch. What is it?  
*Nature Lover*

**Dear Nature Lover:** It is *socia ignota* (blind date). Do not go near. Poisonous.

**Dear Dr. Frood:** I am a math professor. Over half my students are flunking their tests. What can I do about this?  
*Discouraged*

**Dear Discouraged:** Use Frood's Formula: Divide distance between students' chairs by 2. Since chairs will now be closer together, result should be a 50% improvement in exam grades.

**Dear Dr. Frood:** Last Saturday my girl told me she couldn't go out with me because she had a cold. Next day I found out she was out with my roommate. Think I should stay away from her?  
*Disillusioned*

**Dear Disillusioned:** Better stay away from your roommate. He's probably caught the cold now.

**Dear Dr. Frood:** I understand that your hobby is cooking. Mine is, too. But my girl friend says any guy who cooks is a sissy. How can I make her stop laughing at me?  
*Cooky*

**Dear Cooky:** Place a large cauldron of oil over a high flame. When it comes to a boil, add your girl friend.

**Dear Dr. Frood:** Should a man marry a girl who makes more money than he does?  
*Old-Fashioned*

**Dear Old-Fashioned:** If it's at all possible.

## COLLEGE STUDENTS SMOKE MORE LUCKIES THAN ANY OTHER REGULAR!

When it comes to choosing their regular smoke, college students head right for fine tobacco. Result: Lucky Strike tops every other regular sold. Lucky's taste beats all the rest because L.S./M.F.T.—Lucky Strike means fine tobacco.

# FROGS

Continued from Page 8  
which is the best in the conference.

His chief assistant was Sophomore David Warnell, who played most of the last half, and picked up 10. Cobb was third with nine.

Rice made only one less field goal than TCU in the first half, 11-12, and the shooting percentages were a near standoff. The Frogs were 35.9, while the Owls chipped in with 33.3. In the last half, Rice fell to a dismal 30.6, but TCU rose to an outstanding 44.4.

The Owls were paced by substitute Steve Smith who drove home 14 points with 12 of them coming in the last half.

For the first time this year the Christians took advantage of the breaks instead of giving them to the opposition and rolled out to a 20-point margin for the victory.

While TCU was butchering the Rice Owls in Fort Worth's Public School Gym, the Mustangs of SMU were staging a surprise party for the undefeated and nationally ranked Texas Aggies in College Station.

The largest home crowd in A&M history saw history made as Coach Doc Hayes led the underdog horses to a 66-64 victory to break an Aggie 10-game winning streak.

The surprising factor in the game was not in SMU's winning the game, but in the fact that they were leading by 14 points with only eight minutes of playing time left on the scoreboard clock.

Also surprising was the fact that A&M's great sophomore sensation, Carroll Broussard, was held to a maximum of four points. Before the game he had an average of 18.2 points per game.

# FOES

Continued from Page 8  
a top all around player. Played over 50 minutes against us and averaged over four yards per carry.

Warren Rabb—6-1, 190, LSU, was the best quarterback we played against all year. Top signal

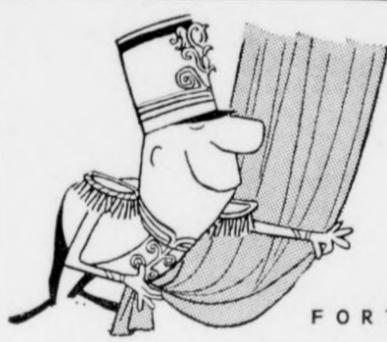

caller and great passer. Many thought he was the bread and butter player of LSU.

Ronny Stanley—6-0, 180, Baylor, on a rainy night in Waco completed 10 of 14 passes against us for 141 yards. I thought next to Meredith he was the best passer in the league.

Lowndes Shingler—6-0, 185, Clemson, was the second string

quarterback. In the Bluebonnet Bowl he completed 2 of 4 passes for 34 yards and ran and gained an extra 65 yards on the ground. For this he was named the outstanding "back" of the game.

# Do You Think for Yourself?

(BUZZ THIS QUIZ AND SEE WHERE YOU LAND!\*)

"A little learning is a dangerous thing" means (A) it's better to leave your mind alone; (B) people who act on half-knowledge often make mistakes; (C) beware of sophomores.

A  B  C

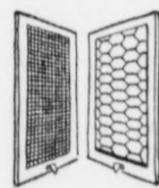

"Never look a gift horse in the mouth" is good advice because (A) he'll bite; (B) even if his teeth show he's old, what can you do about it? (C) there's nothing in there anyway.

A  B  C

Assuming the starting salary is the same, would you rather have (A) a job with an assured income for life, but with no chance to increase it? (B) a job where you'll always be paid according to your abilities? (C) a job where you have to advance rapidly or be fired?

A  B  C

"The finer the filter strands, the finer the filter action" is a way of saying (A) don't use chicken wire in a window screen; (B) Viceroy gives you finest filter action because it has the finest filter strands; (C) the finer the filters, the finer the smoking.

A  B  C

When you depend on judgment, not chance, in your choice of cigarettes, you're apt to be a Viceroy smoker. You

will have found out that Viceroy gives you the best filtering of any cigarette, for a taste you can really enjoy. A thinking man's filter. A smoking man's taste. That's Viceroy!

\*If you checked (C) on three out of four of these questions, you're fairly astute. But if you checked (B)—you think for yourself!

Familiar pack or crush-proof box.

## All-Opponent Team Chosen By Froggies

By HARRY MORELAND

With football season over, it seemed about time to pick a Frog All-Opponent team. From hearing the boys talk about the effective playing of our opponents, I decided to make a stab at picking a team of worthy Frog opponents. I am sure some will disagree with my selections—that is the privilege of any reader—let me know why you disagree when you write.

Such players as Heisman Award winner Billy Cannon or All-America Don Meredith, were left off my team because the team was picked on what they did against the Frogs, not what they did against other teams.

### The Top Team

Before we pick the All-Opponent team let's choose a top team and top player opposing TCU.

Many folks thought Texas, LSU or Clemson was tops. I would choose Arkansas. I was impressed more by the team speed and "gang" tackling of Arkansas than by any team we have ever played against.

In picking the outstanding player, I don't think I would have many objections in picking Texas Tech's great center, E. J. Holub. In my books he is flawless. This year, as a junior, he was picked by many All-America teams. Next year he is sure to be a unanimous choice.

### All-Opponent Team

With this over, here's my list of the All-Opponent Team.

**Gary Barnes**—6-0, 185, Clemson, was an All-Atlantic Coast Conference end as a soph. Against us he played a great defensive game and caught the 68 yard scoring pass in the third period that put them ahead 10-7.

**John Peppercorn**—6-2, 195, Kansas, made All Big Eight as a tackle his junior year and was shifted to end his senior year. Played his first game at end against us and was by far the best defensive player for Kansas.

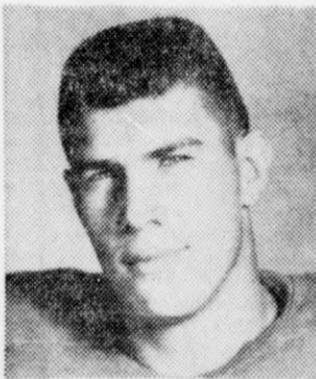

**Lou Cordileone**—6-2, 245, Clemson, made many All-America teams. Played in the East-West Shrine game and was named most valuable lineman. Against us he was more like a stone wall than human.

**Glen LeBlanc**—6-2, 215, LSU, was the captain of the Tigers. Played good all around football—reminds you a lot of Floyd.

**Maurice Doke**—6-1, 200, Texas, was shifted from end to guard and ended up by making All-America. He drew compliments from everyone he played against. Against us he was in on 15 tackles. Named outstanding lineman in the Cotton Bowl.

**Herby Adkins**—6-0, 185, Baylor. Only a sophomore and very small, but is quick and tough. He gave everybody on our team a hard time.

**E. J. Holub**—6-3, 215, Texas Tech, made All-America this year

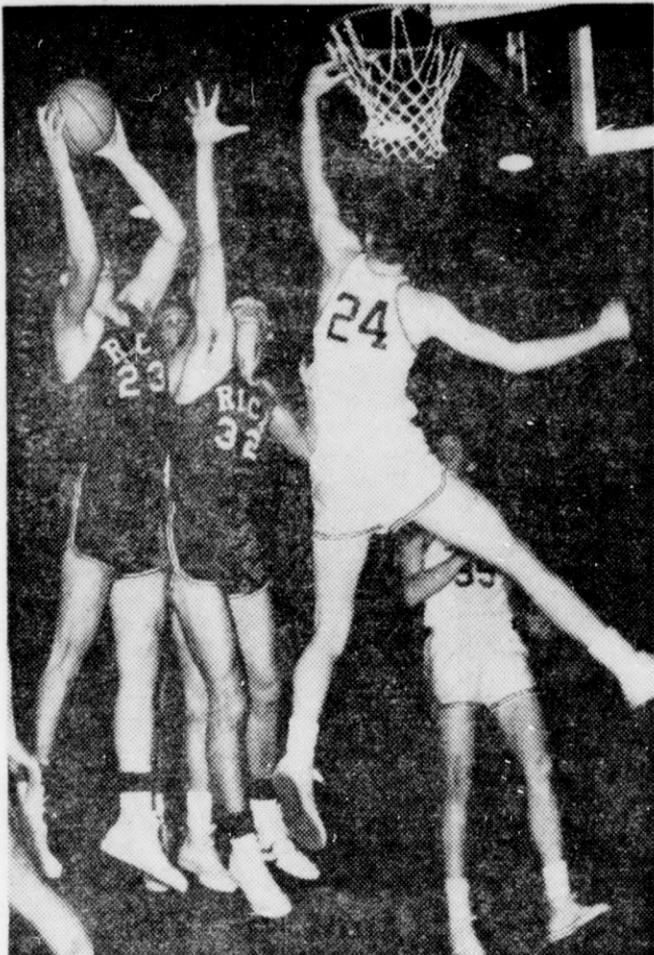

E. J. HOLUB

as a junior. One of the top line backers in the country. Nearly everyone on the team agrees Holub is the best lineman we played against.

**Billy Bucek**—6-1, 190, Rice, is

See FOES on Page 7

Oops, You Missed

Jerry Pope (24) reaches up for a rebound, but the Rice Owls' Gary Griffin (23) grabs the ball and seconds later takes it back down the court. The Frogs won 86-63.

## Two-Platoon System Again?

# Pigskin Rules-Makers Meet

College football rule-makers are meeting in Miami Beach, Florida, to deliberate on the grid substitution question.

It virtually amounts to a showdown between coaches and the men who govern NCAA policies. An eight-man Committee will have to weigh the present substitution rule against amendments fired at them from every direction.

Some coaches want the number of "wild card" substitutions increased from one to two. Other coaches say constant changes in rules hurt the sport, and are satisfied with the present system.

A return to the days of the platoon football of the early 40's through 1952 appeared unlikely in view of the conservative make-up of the eight-man committee.

The leaders in the fight for unlimited substitutions is the Big Ten and the Atlantic Coast Conferences. The Big Ten is believed ready to legalize platoon football in its own conference

games if the rules committee does not restore it.

Some observers say the NCAA will have a terrific squabble on their hands if the Big Ten defies the rules committee's decree. But they add, they think the Big Ten will abide by decisions of the committee.

In New York, earlier this week, the NCAA recommended that the rules committee stand by the present limited substitution rule. Gen. Robert Neyland, chairman of the committee, said Saturday, "The group will give thorough consideration to any suggested rule change. The body will take a completely fair and impartial attitude on the problem."

Last year at this same meeting the width of the goal posts were widened. Neyland reported that this year nearly everyone is satisfied with the way they are.

The rules committee is made up of: Jess Neely of Rice, Bud Wilkerson of Oklahoma, Ivy Williamson of Wisconsin, John Roning of Denver, Dave Nelson of Delaware, Frank Howard of Clemson, Norman Danielse of Wesleyan (Conn.) and Leo Harris of Oregon.

TCU coach Abe Martin was

named to this group as a new member last week at the New York general meeting.

See FROGS on Page 7

## Frogs Blast Owls; SMU Upsets A&M

By SANDY McSPEDDEN

The battling Frogs pulled out of the Southwest Conference cellar Tuesday night by blasting the Rice Owls completely out of Public Schools Gymnasium, 86-63.

The Christians gave their staunch 800 supporters and the Rice Owls an inkling that they were a much better basketball team than some of their previous scores have indicated. They did this by jumping to a quick 12-0 lead and followed through to their first league victory, giving the Owls their third setback without a victory in the SWC race.

Rice was obviously handicapped with its leading scorer, David Craig, back in Houston fighting the flu.—The visitors were never closer than four points to the Fort Worth team.

With the Frogs popping the nets to the tune of a 54.9 shooting spree in the second half, Rice quickly fell behind, 57-36, in the first six minutes and

three seconds. Both coaches, Johnny Frankie and Buster Brannon, used their reserves liberally.

Last Saturday the Owls ran Texas out of their zone defense, and nearly beat the Steers, but the Rice team couldn't keep their shooting eye hot long enough to endanger the Frogs.

Jerry Cobb got things rolling early for TCU. He took the first shot, hit it and in the next eight minutes he registered 12 of TCU's 20 points. He had 16 for the evening. The 6-3 junior helped take the fight out of the Owls.

Bobby Bernard didn't hit in the first half but Rice will remember him well for his last-half performance. The 6-5 sophomore from Graham wound up with a total of 15 points, connecting on 7 of 15 field goal attempts.

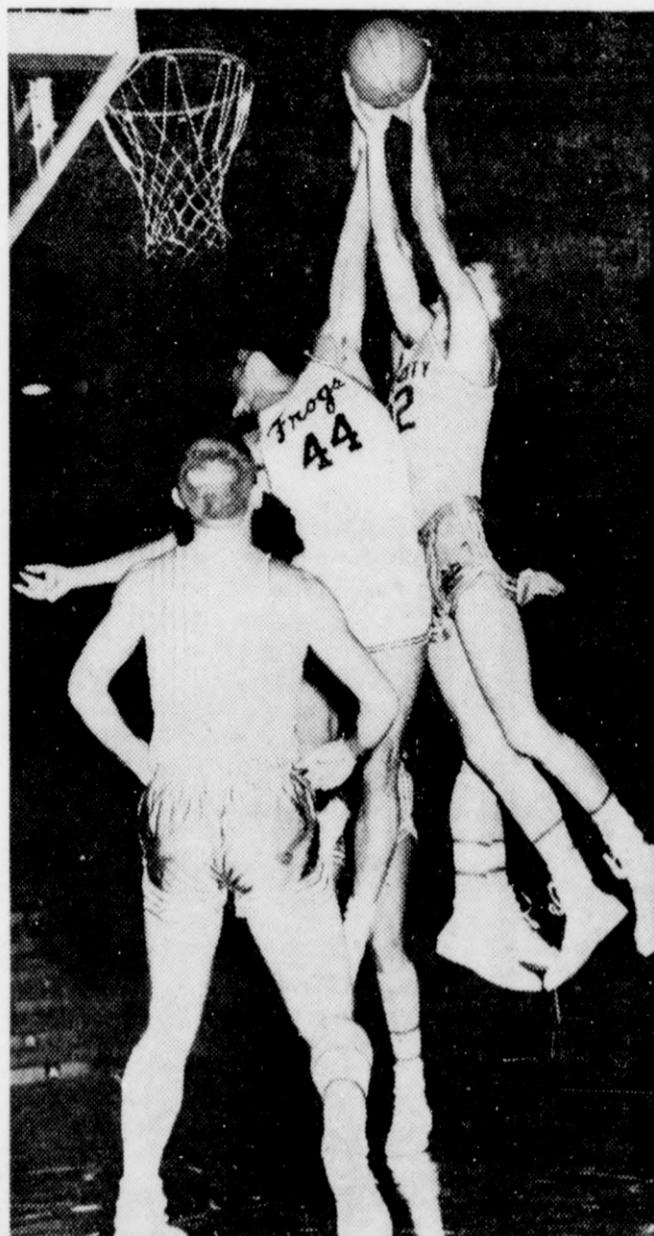

Equally as impressive as Cobb and Bernard, was the tremendous rebounding job by Tommy Meacham and the sparkling feeding and defensive play by Bobby Tyler.

TCU dominated the boards, getting 67 rebounds to 45 for Rice. Meacham, the 6-5 senior from Poly, was the big reason. He came down with 20, to run his total to 136 for the season.

See FROGS on Page 7

## SKIFF SPORTS

Page 8 Friday, Jan. 15, 1960

Watch for Him

Sophomore Bobby Bernard (44), one of the coming guns for the Frogs, making it difficult for the Oklahoma City Chiefs as he tries for a rebound.

## Bernard Rated Top Prospect For Brannon's 'New' Team

Bobby Bernard figures to be one of the major tools in Coach Brannon's plan for rebuilding a championship basketball team for TCU.

A high school All-America, Bernard proved himself last year on the freshman team. He was number three frosh scorer, averaging 15.2 in 12 games. In the SMU game last year, Bob hit 13 of 17 and got a total of 29 points. He is noted for his hook and terrific spinning jump shot around the circle and baseline.

Bernard is among the three tallest players of this year's team at 6-5. He weighs a hefty 212 pounds.

With his speed and size, he should be a top rebounder.

Bernard makes a good forward on the low portion of the tandem-post, with Williams high. He needs a little more polish under the backboards, but this will improve with time and experience.

Because of the loss of such men as Ronny Stevenson, H. E. Kirchner, Derrill Nippert, Kenneth King and Kenneth Brunson, Coach Brannon is faced with one of the most complete rebuilding jobs of his career.

Brannon is not expecting a repeat on last year's Southwest Conference basketball championship, but Bob Bernard in his guard position should go a long way in Coach Brannon's rebuilding plans.
