House Legal Adviser Answers His Critics

By FRANK LEWIS

Some persons have been writing him letters who don't know the facts, said House legal adviser, Chuck Marler.

He was referring to several letters he has received about his decision on the April 26 elections, to allow Susan Light to remain as an elected cheerleader.

The question of her eligibility arose when the Elections Committee disclosed they could not find her expense account which was required to be submitted by all candidates by 6 p.m. election day.

No Abuse

Marler added that Miss Light said she had submitted an ex-

pense account by the deadline although it was on scratch paper.

She was not disqualified "because she did not abuse the purpose of the expense account rule," the legal adviser said.

If the persons who wrote the letters knew the facts then "they would see the reasoning" and agree with the decision, Marler continued.

There is nothing in the rules that says a candidate must be disqualified if he does not submit an expense account by the deadline, according to Marler.

Miss Light's expense account could have been lost since there was no locked box provided for the expense accounts, Marler added.

Marler's decision, which he issued at 12:30 a.m. following the run-off elections, said in part:

"As legal adviser, I firmly believe and adhere to strict enforcement of the election code. However, when adhering to rules and regulations, one must not lose sight of why the rules were made."

"These rules were made to guarantee fair and equal competition."

Purpose of Account

"The purpose of the expense account is to make sure no candidate was unfair to her competitors by going over the maximum expense for her campaign."

"Since Miss Light's expenses were not over the maximum and she did not violate any other rule, she will remain as a duly elected cheerleader."

Miss Light received the largest number of votes of any girl cheerleader in the run-off elections.

The results for those girls elected cheerleader were: Miss Light, 1036; Andrea Lockwood, 939; Alicia Golsan, 917, and Susan Beard, 840.

Had Miss Light been disqualified then Susan Stevens with 771 votes would have been elected.

KTCU News reported on election night that the Elections Committee had also delayed awarding a decision in the race for representative from the M. J. Neeley School of Business until after a conference with one of the persons in the race.

Cabinet Discusses Car Space Worries

The growing automobile overpopulation on campus has gained the attention of the administration, Dean Howar Wible announced Thursday in the University Cabinet.

The dean of students reported that Chancellor J.M. Moudy has directed a committee to study the problem, which is becoming more serious with the University's expansion in buildings and in car registrations.

The committee has made trips to North Texas State University and to Southern Methodist University in order to compare parking control methods.

One solution in use on other campuses is controlled access parking. If this plan were pursued, parking permits would be checked at the parking lot entrances by an attendant in order to more strongly enforce the current permit regulations.

In the event of full lots, no more cars would be admitted, to prevent illegal parking.

Any decision by the Cabinet would be postponed until next fall.

Dr. James W. Newcomer, vice chancellor of academic affairs, raised a question about the fate of the faculty evaluation publication.

Former House of Representatives President Drew Sawyer explained that the publication was a large task without proper finance.

He added that there is still no agreement on who is to handle the publication. The House of Representatives is a strong candidate for the task.

Dr. Wible suggested that if the House handled the publication it could help the House image.

"It would be a meaningful project that could put the House over in the minds of the students," Dr. Wible commented.

Dr. Newcomer mentioned the new school policy of assuming the

cost of tuition for students who wish to attend TCU, and who meet academic requirements.

The Cabinet closed its last session of the year by passing two proposals intended to help improve its efficiency.

It was decided that the Cabinet would meet twice a month instead of once and that the first session next year will be an orientation session for new members.

Sawyer introduced two new members to the Cabinet, Steve Swift, newly-elected student body president and Frank Cain, newly-elected student body vice president.

Scott Women Honor Belles

The 1968 Frogette Beauties were presented May 6 at the final meeting of the William Edrington Scott Theatre Women's Committee.

The girls were the co-guests of honor with the Dallas Theatre Executive Board. After the meeting and a lecture by a novelist, the girls were presented and Miss Horned Frog was named.

Miss Horned Frog for 1968 is Jacque Rogers Denning.

Senior Beauties are Miss Vicki Zima and Miss Janie James.

Junior Beauties are Miss Peggy Aars and Miss Julie Martin.

Sophomore Beauties are Miss Cherry Overton and Miss Leslie Watkins.

Freshman Beauties are Miss Paula Jay and Miss Tricia Triesch.

The Horned Frog extended its congratulations to the girls and its thanks to Mrs. Jackie Eagle, president of the William Edrington Scott Theatre Committee.

First Senate To Convene

The election of 36 members to the University's first Faculty Senate has been completed, announced Dr. John F. Haltom, chairman of the Faculty Election Committee.

The Senate membership will consist of 22 representatives of schools and colleges, and 14 members at large.

According to the Faculty Assembly's Constitution, seven members of the Senate are elected at large each year for two-year terms.

In the first election, however, 14 members have been elected, seven of whom will serve two years, and seven of whom will serve one year.

Already elected to the Senate from AddRan are Dr. Paul G. Wassenich, two years; Dr. John F. Haltom, two years; Dr. Jim W. Corder, two years; Dr. Arthur J. Ehlmann, two years; Dr. Malcolm D. Arnoult, two years; Dr. Frank T. Reuter, one year; Dr. Bita Mae Hall, one year; Dr.

Jerry B. Michel, one year; Dr. John L. Wortham, one year; Dr. Floyd Durham, one year, and Dr. Bobby L. Sanders, one year.

From Fine Arts are Dr. Richard P. Douthit, two years and Dr. George T. Tade, one year.

Dr. Jeff L. Horn, two years, and Dr. Ben Strickland, one year, will represent the School of Education.

The two representatives from Brite and the two from Nursing respectively, are Dr. Harold L. Lunger, two years; Dr. M. Jack Suggs, one year; Dr. Mary Ann Lane, two years, and Petty C. Steele, one year.

Newly-elected members at large who will serve for two years are Dr. Comer Clay, Dr. Ralph Guenther, Dr. Keith Turckett, Dr. Moffitt Cecil, Dr. Maurice Boyd, Mrs. Betsy Colquitt and Dr. Michael Winesanker.

Serving for one year are George Reeves, Charles Isoline, Dr. Marguerite Potter, Dr. Ted Klein, Dr. Leo Baggerly, Dr. John Forsyth and Dr. Nevin Neal.

Club Offers Foreign Jobs

Three members of the AIESEC (Association Internationale des Etudiants en Sciences Economiques et Commerciales), TCU chapter, will take traineeship positions in the companies of foreign countries of their choice, this summer.

The students, Pete Dauterman, Mike Woodward and Tom Ellison, will work in Ireland, Sweden and Denmark respectively.

The club provides for students from different countries to be exchanged on traineeship programs.

One foreign student from Sweden, Switzerland, France and England respectively, will come

here as part of the exchange program.

Other activities offered by the club include meetings with Fort Worth's top businessmen, and attendance at regional, national, and international conferences.

Local members also provide for the welcoming committee when the foreign exchangees arrive in Fort Worth.

Interviews for prospective members of the committee will be held on Thursday, 12-4, and Friday 12-5, room 104, Rogers Hall. Anyone interested in economics or business is invited to join.

IMPRESSIVE-LOOKING GATHERING of "Skin of Our Teeth" characters includes (l-r) Maggi Moar, Jim Covault, Ronnie Jo Simon, Bonnie Riley and Dudley Layne. Play runs through Thursday night.

Center To Offer Pastoral Care

A national survey report on pastoral care has revealed that 52 per cent of all people in times of stress turn first to their pastors.

So disclosed Dr. Charles Kemp in emphasizing the need for a Pastoral Care and Training Center at Brite Divinity School.

Such a center would aid church laymen and community members who seek answers to personal or professional problems. To this end, such a center will be open at the beginning of the 1968-69 academic year.

It will be open to members of all denominations and all faiths and operated under the auspices of the Brite Divinity School.

Center Director

The Rev. Charles H. Sanders II, associate minister of Fort Worth's University Christian Church since 1964, will be the director of the new center.

A Dallas native, the Rev. Sanders serves on the pastoral care committee of the Fort Worth Council of Churches and on the board of the Family Service Association.

The University Christian Church will provide facilities for the center during its initial stages next year. Psychiatric services are to be provided by Southwestern Medical School in Dallas and its psychiatry department headed by Dr. R.L. Stubblefield.

Planning for the new program at TCU was begun with a \$12,000 gift by the family and friends of the late Dr. James T. McKisick, an 1896 alumnus of TCU

who served more than 60 years in the Christian ministry. Other gifts are being donated by friends of the University.

The TCU center will provide counseling services for laymen who are referred by their ministers as well as for non-church members who may seek help in solving personal, social and spiritual problems that normally would be within the responsibilities of a congregation's minister.

Religious Counseling

Religious counseling will also be available for TCU undergraduates, Brite students and their wives.

In addition to service, the program will provide opportunity for

supervised experience for graduate seminarians.

Brite dean, Dr. Elmer D. Henson said, "This new program will be a significant expansion of Brite. It will furnish us with laboratory experiences that will be invaluable as a teaching method, and it will enable us to implement a program in pastoral care as one of the major disciplines of a professional doctorate when the new degree program is initiated."

Dr. Kemp, who is a distinguished professor of pastoral care and pastoral psychology said, "We see the new program as a challenging opportunity for both significant service and practical training."

Journalists To Hear Harper's Chief Editor

The annual Journalism Awards Banquet, Thursday at Western Hills, will be highlighted by Willie Morris, Harper's Magazine's editor-in-chief.

Morris, the youngest person ever to serve as chief editor for a national magazine, has attracted much attention for Harper's, said Jay Milner, of the Journalism Department. Milner was Morris' associate editor of the Austin-based "Texas Observer" in 1962.

Since he has headed Harper's, many top young writers, such as Norman Mailer, William Styron and George Plimpton, have contributed to the magazine, said Milner.

Morris is widely acclaimed for his autobiographical work, "North Toward Home," which won the Houghton-Mifflin Literary Fellowship Award for non-fiction. His speech, appropriately enough, is titled "South Toward Home." He will be introduced by Milner.

The various journalism and advertising awards will be presented after dinner. They are the Best of Skiff Award for three Skiff staffers in each of six categories, the Dallas Press Club citations for four students, the Fort Worth Press Award for the best male and female reporters and an award to the outstanding male and female graduates. Other awards will be the Minneapolis Star Scholarship, Theta Sigma Phi Scholarship and the Ridings Journalism Scholarship.

Advertising awards will be the Thomas L. Yates Memorial Ad-

vertising Scholarship and citations for the two outstanding graduates in advertising.

Summer interns will be announced. The new Skiff and Horned Frog editors will be introduced, and the yearbook dedication will also be announced.

About 350 persons are expected to attend.

Poet Named To Faculty

Author of numerous published works and recipient of several distinguished awards, Dr. William S. Burford will join the faculty in September as associate professor of English.

The Shreveport, La., native graduated "magna cum laude" from Amherst College in 1949. He earned both his M.A. and Ph.D. degrees from Johns Hopkins University.

Dr. Burford is a member of Phi Beta Kappa and was a Fulbright Scholar at the Sorbonne from 1951 to 1952.

He was also named recipient of the Irene Glascock Award for Poetry, the Philadelphia Institute of Arts Award for Poetry and the Texas Institute of Letters Award for Poetry.

His first published volume of poems was "Man Now" and his most recent is "The Poet's Vocation."

Committee Undergoes Face-Lifting

By J.D. FULLER

The Exhibits Committee recently underwent a face-lifting operation to solve some of its varied organizational problems, and to increase its attractiveness to students on campus.

According to Larry Crist, outgoing chairman of the committee, the new program could alter the committee's image and increase its efficiency.

Instead of one large committee responsible for all exhibits, next year's organization will include six "task" committees that will cover such topics as art, TCU, elections, antiques and others, said Crist.

Army Lists Officer Plan

College graduates may still receive commissions as second lieutenants in the U.S. Army, even though they did not participate in the ROTC program.

The alternative is offered by the College Option Officer Candidate School, it was announced by Maj. Ben E. Killebrew, assistant professor of military science at TCU.

The program is designed to supplement the other officer procurement programs, such as ROTC and the U.S. Military Academy.

College graduates who meet the minimal physical, mental and moral qualifications may enlist for this program.

The enlistee may elect to enter active service immediately upon enlistment or may choose the Delayed Entry Program whereby active duty service may be delayed for up to 120 days after enlistment.

Effective May 1, an enlistee for the College Option Program may indicate a branch preference, but is not guaranteed assignment to a preferred branch as has been the case in the past or as it is in the ROTC program.

Precommissioning training consists of eight weeks of basic combat training, eight weeks of advanced individual training and 23 weeks of Officer Candidate School (OCS).

Upon successful completion of OCS, graduates are appointed second lieutenants in the U.S. Army Reserve (USAR).

Upon enlisting for this program, the graduate assumes a total service obligation of six years. The active duty obligation is approximately eight to 12 weeks short of three years.

This includes the 41 weeks of precommissioning and leave, plus two years of commissioned service. The remaining obligation is served in a reserve status, such as the National Guard.

The recruiting objective for the current fiscal year is 9600 from the OCS program.

The number of candidates needed is dependent entirely on the needs of the active Army, and the increased production from ROTC and West Point after fiscal year 1969 should reduce the number of officers required from OCS.

The result could be a lessening of opportunity for graduates to enlist under the OCS option.

Each of these committees would be responsible for three exhibits per semester, he continued. One committee involved in a particular topic could produce a better exhibit because its members would be interested in that topic and would have an entire semester to produce three exhibits.

Many Lose Interest

Crist, a Brite Divinity student from Fort Worth, hopes that this organization will hold the interest of committee members.

"The Exhibits Committee started the year with over 20 persons, but because everyone had to work on every exhibit, a lot of people lost interest."

Other people got too involved and finally gave up, he continued. The "task" committee system wouldn't wear anyone out, Crist added.

Another organizational change will be in the form of a "troubleshooter" committee that will be responsible for setting up unscheduled exhibits.

Crist outspokenly discussed many of the problems his committee faced this past year.

"One of our biggest problems all year long has been the defacing and theft of exhibits. This is something we haven't been able to overcome, but we are trying to keep honest people honest," he said.

He pointed out the committee's biggest mistake was that it had too few exhibits during the past year.

"We got off to an awfully slow start, and didn't get organized quickly enough. It took us two months before we actually started doing something," he added.

Another Mistake

Crist said that another mistake made by the committee was its failure to utilize Fort Worth's resources in presenting exhibits.

He added that next year the committee would probably include exhibits from Amon Carter Museum, Hemisfair, Old Bergen Art Gallery and the Smithsonian Institute.

The aim of the Exhibits Committee is to reach as many students and faculty on campus as

possible with the exhibits, Crist said.

He continued, "This year we learned what exhibits attract the people on this campus."

Then, the group tried to get more of these exhibits on campus. In the past, this committee wasn't really big enough to do any significant things, he added.

Crist pointed out that there are plans for having "different" ex-

hibits for next year. These include an antique car show, a display of precious gems, numerous art sales and a "resident" artist, who would paint and give lessons while he is here.

He explained, however, that these exhibits are merely in the planning stage and will take a lot of work before they become a reality.

The Exhibits Committee, a

subcommittee of the Activities Council, has also helped their counterparts present programs during the year, Crist pointed out.

Summing up the committee's outlook for next year, he said, "This will be one of the most exciting committees on campus because it will be totally involved within the campus community."

Election Loopholes Seen As Upholders of Justice

As usual, the recent campus elections caused a bit of controversy and certain individuals around campus are dissatisfied. It happens every semester.

This time the dissatisfaction centered around the race for vice president and the battle for the four girl cheerleader spots. In the first case, the "injured party" had a point; the second squabble looks like a case of sour grapes.

The aspect of it all which amazes us is that people can argue for hours over technicalities and ignore reality.

The write-in candidate for vice president definitely was within his rights in insisting that all the votes be counted, but considering the overwhelming margin by which he lost, it hardly seems worth causing extra work for a lot of people just to prove a point.

We can at least understand Doug Amerman's viewpoint, how-

ever, even if we don't agree with him. The furor which has erupted over the cheerleader race is considerably harder to understand.

In that particular race, Susan Light received more votes than any other candidate, which indicates to us that she was the number one choice of the majority of those who voted (we assume that those who didn't vote don't care one way or another). In view of this, it seems a bit silly to demand that she be disqualified through a loophole in the rules, and a questionable loophole at that.

In this situation, the House legal adviser was at liberty to decide on the matter. He made his decision, and we think he was right. The complaint has frequently been voiced that our election code is too flexible. We think that flexibility is a benefit, not a deficiency.

Editor's Mail

Society Needs To Complete Unfinished Task of Brotherhood

Editor:

It seems that the crisis in human affairs and the imperatives of the times require that we make some important decisions and that we manifest some definite choices.

Do we choose that opportunity for all, that respect for the dignity of each person, shall become a fact in our way of life?

Shall equality, irrespective of a person's natural endowments, mean the equality endowed of all men—the right to life, liberty and the pursuit of happiness. Is this the quality of equality we choose to have for the family of man, and will we defend it on the campus, in the church, in our employment policies, in personal relations, in community relations and in the market places? Is this our choice?

Each of us has the expectancy of a life of well-being; and it is out of frustrated expectations that revolution is born, hence we can in no manner withdraw ourselves nor our concern from those less fortunate than ourselves.

There is, therefore, the necessity for a calm and introspective examination of ourselves, our community and our nation and in solemn conscience ask what

we are—what are our motives—what are our sense of values and what kind of society is our choice? The answers must be prayerfully given and with wisdom and in courage.

President Kennedy once reminded us we are in an age of change and said: "We will be face to face every day in every part of our lives and times, with the real issue of our age, the issue of survival."

Survival in a good society, in my opinion, will require that we complete the unfinished task of brotherhood.

Teamwork and mutual respect among the citizenry is the needed and essential influence in American life. The American team composed of all its people—all its races; of all its political views, must in full devotion and with atomic-like energy and good will, move in full and even front to the goal of full opportunity and full living, for all the people of America, even for the peoples of the Earth, regardless of nation, race, creed or class. This we pray may be the American commitment, the American destiny—thus creating a society structured on the enduring qualities of the Judeo-Christian faith.

Edwin A. Elliott
President, Class of 1963

Editor:

As a foreign student, I kindly beg your consideration in allowing me space in your paper to pay respect to one of your great countrymen, the late Dr. Martin Luther King, in the following lines—

From the nadir of the southern sky
This beacon rose,
To point the way of hope instead of hate;
Then like a meteor from Zenith fell,
To light a bleak world with its after-glow.

Also, on behalf of all the foreign students and members of the International Friendship Club, I the undersigned would like to express my profound gratitude to all the various organizations on and off campus, too numerous to mention; and to individuals such as: Miss Catherine Fitting, Miss Maelynn Baird, Mrs. E. Proffer, Mr. Butler, Dr. R. Parker, Dr. R. Dillehay, Dean Murray and their fine crew of helpers for the splendid job they have done to make the 1968 International Festival the success it was.

Good, very good show!
Herbert A. Lowe

Traumatic Events During College Life Good Reunion Tales

By PAULA WATSON

Well, it's that time of year again—Easter vacation is over and the mad rush has begun either to start making up work or to study for finals.

This is also the time of year that students usually reflect back upon what has transpired during the semester. For those who are graduating, the look back may be at the events of the past few years.

Who can forget the hundreds of cheeseburgers, french fries (with ketchup, please), cups of coffee and mugs of beer consumed during those four (or was it five?) years of college life (existence).

Memorable Moments

Other memorable moments include cramming for those hundreds of exams the night before, or how about all the times a midterm paper was due at eight o'clock Tuesday and you remembered it as you arose at 10 a.m. that same day.

Then there are certain events—The Great Happenings—which stand out above all else:

—The Last Great Panty Raid of 1964. Although unsuccessful, it did accomplish the feat of wrecking havoc, especially concerning the administration.

—The day which was cancelled due to apathy, or non-involvement if you prefer.

—The Altizer Speech and the "God is Dead" theory, which was interrupted by a Bible-wielding minister who called the speak-

er an "advocate of the devil."

—The night everyone donned formal attire just in time to discover that the dance had been cancelled.

—The day you went out to your car and discovered that sometime during your nine o'clock class a "Reserved for Faculty Only" sign had been planted with loving care in the asphalt of the parking lot. The topper came when you found that you couldn't open your car door for it.

—The secession of Clark Dorm from The Union, that is, the University rules.

—Tom Brown Dorm's "revolution of '68."

Years' Highlight

—Highlighting the years have been those occasional entertaining House of Representatives (Student Congress if you're really behind the time) meetings at which campus legislators faced the issues—potluck specials, purple and white fire plugs and anti-shock carpet spray are standouts.

—And who could forget the

Pink Blob, the pink bus stop bench in the heart of Purpleland. Such contrasting colors would never do.

—Then there was The Great Debate of 1968 at which the pros and cons of U.S. involvement in Vietnam were discussed, followed by an unusual amount of campus comment.

—One of the biggest issues during the past four years has concerned the meeting of the minds on faculty evaluation.

—Or how about the Day of the Big Surprise? That's the day you went to the library and found the book for which you were looking, for the past three years.

—And then came the Great Day of Progress—the underground sprinkler system went in and so did you, you fell into the trench on your way back from night class.

These are just a few of the memorable happenings (most of which are actually traumatic experiences) that occur during those good old college days—you know, the type you'll be telling at the class reunion 10 years from now.

Campus News in Brief

Through the use of a new scholarship plan, qualified students, who might be financially unable to attend a university, may now enroll at TCU.

The new plan is limited to students who will reside at home and commute to the campus.

To be eligible for the scholarship, a student must have a scholastic Aptitude Test score above 1100 and must rank in the upper half of his graduating class.

The amount of financial aid will vary and could be up to an amount equal to full tuition, depending on the individual's demonstrated need.

The scholarship will be renewable providing the student maintains a 3.0 grade average in his academic studies.

Applications are now being accepted and any additional information may be obtained from Logan Ware, TCU director of financial aid.

Dr. Nathan A. Scott, an Episcopalian priest and author of numerous religious and literary books, will speak on "The Conscience of New Literature" at 8 p.m. Wednesday in the Faculty Center.

Dr. Scott, professor of theology and literature at the University of Chicago School of Divinity, introduced the subject of religion in relation to literature to the University of Chicago 15 years ago.

Reservations for the event may be made through the English Department.

Dr. William A. Owens, professor of creative writing at Columbia University and author of various literary works, will be the principal speaker at the Creative Writing Convocation, Thursday.

Dr. Owens will speak on "Walter Mitty and Other Fantasy Makers."

The Convocation, to be held in Ed Landreth at 11, will be followed by an awards luncheon and autograph party in the Sam P. Woodson Room of the Student Center.

An autograph tea will be held immediately following the Creative Writing Awards Luncheon Thursday from 3 to 4:30 p.m.

The event will be hosted by the Bryson Club. The reception will honor the distinguished guests, authors and awardees of the Creative Writing Day activities.

The distinguished guests include Dr. Nathan Scott of the University of Chicago, Mrs. J. Frank Dobie and Dr. William A. Owens,

principal speaker of the Creative Writing Convocation.

The awardees will include winners of the writing competition in the fields of poetry, short story, drama, non-fiction prose, children's literature, narrative of fact, essays, fiction, research and Southwest literature. The winners of the several named awards will also be present.

FROM THE HALLS OF PROTOZOA

This column, normally a treasure house of twinkly quips and slapdash japey, has now been appearing in your campus newspaper for fourteen years, and if I have learned one thing in these fourteen long years, it is not to try to be funny in the last column of the semester. With final exams looming obscenely close, you don't want jokes; you want help.

So today, foregoing levity, I give you a quick cram course in the subject you are all flunking. I refer, of course, to biology.

Biology is divided into several phylla, or classes. First is the protozoa, or one-celled animal. Protozoa can be taught simple things like bringing in the newspaper, but when shopping for pets it is best to look for animals with at least two cells, or even four if your yard has a fence around it.

Another popular class of animals is the periphera—a shadowy category that borders often on the vegetable. Take, for example, the sponge. The sponge is definitely an animal. The wash-cloth, on the other hand, is definitely not.

Next we come to the arthropoda, or insects. Most people find insects unattractive, but actually there is exquisite beauty in the insect world if you trouble to look. Take, for instance, the lovely insect poems of William Cullen Sigafos—*Tumbling Along with the Tumbling Tumblebug* and *Fly Gently, Sweet Aphid and Gnats My Mother Caught Me*. Mr. Sigafos, alas, has been inactive since the invention of DDT.

Our next category is the mollusca—lobsters, shrimp, and the like. Lobsters are generally found under rocky projections on the ocean bottom. Shrimps are generally found in a circle around a small bowl containing cocktail sauce. Personna Super Stainless Steel Blades are generally found at any counter where Personna Super Stainless Steel Blades are sold.

I mention Personna Blades because the makers of Personna Blades pay me to write this column, and they are inclined to get edgy if I neglect to mention their product. Some get double edged and some single, for Personna Blades come both in double edge style and Injector style.

Mind you, it is no burden for me to mention Personna, for it is a blade that shaves quickly and cleanly, slickly and keenly, scratchlessly and matchlessly. It is a distinct pleasure to shave with Personna Blades and to write about them but sometimes, I confess, I find it difficult to work the commercial into a column. Some years ago, for example, I had the devil's own time working a Personna plug into a column about Alexander the Great. The way I finally managed it was to have Alexander say to the Oracle at Delphi, "Oracle, I have tasted all the world's pleasures, yet I am not content. Somehow I know there is a joy I have missed." To which the Oracle replied, "Yes, Alexander, there is such a joy—namely Personna Blades—but, alas for you, they will not be invented for another 2500 years." Whereupon Alexander fell into such a fit of weeping that Zeus finally took pity and turned him into a hydrant... Well sir, there is no question I sold a lot of Personnas with this ingenious commercial, but the gang down at the American Academy of Arts and Letters gave me a mighty good razzing, you may be sure.

But I digress. Back to biology and the most advanced phylum of all—the chordata, or vertebrates. There are two kinds of vertebrates: those with vertical backbones and those with horizontal. Generally it is easy to tell them apart. A fish, for instance, has a horizontal backbone, and a man has a vertical backbone. But what if you run into a fish that swims upright or a man who never gets out of the sack? How do you tell them apart? Science struggled with this sticky question for years before Sigafos of M.I.T. came up with his brilliant solution: offer the creature a pack of Personna Blades. If it is a fish, it will refuse. If it is homo sapiens, it will accept—and the more sapient, the quicker.

And now you know biology. And now, for the fourteenth time, aloha.

©1968, Max Shulman

The makers of Personna, The Electro-Coated blade, have enjoyed bringing you another year of Old Max. From us too, aloha.

Confusing Classifications Clarified

Knowing the concern of all male students regarding the military draft, The Skiff has attempted to define more clearly the deferments available.

At this time there are five classifications in the Selective Service regulations which may affect students beyond high

JCC-TCU Exchange Organized

The deadline for applications in a TCU-Jarvis Christian College exchange program, involving approximately 15 students from each school, is Friday.

Janice Peterson, CESCO chairman, said the exchange program is designed to provide students with an experience of living as a minority group.

Miss Peterson said students accepted for the week-long program will study courses in their major and minor subjects as well as courses in the regular curriculum.

TCU students will spend the week of Oct. 13-20 at Jarvis Christian College, and the following week, Oct. 20-27, Jarvis students will attend school here.

Miss Peterson added that students involved in the program will be provided with information of different campus activities during the week and will live as a minority student within the academic community.

Students who apply for the program must have a 2.5 grade average, and will be chosen on basis of geographic origin, field of study and personal interviews in order to obtain students from widely diverse backgrounds.

Applications are also needed for students to act as hosts when Jarvis students attend TCU.

Miss Peterson said the administrations of both schools are giving their full support to the program. She added that all students involved in the exchange program to Jarvis will receive of official absences.

Applications are available in the Student Activities office and should be turned in to that office or the CESCO office.

school. Four of these defer a student and the other exempts him from military service.

One of these deferments is not exactly based on student status but can affect him. This classification code is 1-D.

The three deferments based entirely on student status are classes 2-S, 1-S (C), and 2-A. The one exemption given is class 4-D.

Class 1-D

Class 1-D includes any man continuing enrollment toward the senior division of the Army, Navy or Air Force ROTC, those selected for the Naval or Marine Corps officer training program, the reserve officers candidate program of the Navy, the platoon leader's class of the Marine Corps, the officer procurement program of the Coast Guard and the Coast Guard Reserve, or any man appointed an ensign in the U.S. Naval Reserve while undergoing professional training.

A man is also given a classification of 1-D if he has been accepted as an aviation cadet by the Army, Navy or Air Force.

Military college students in an officer procurement program, which is approved by the Secretary of Defense, are also eligible for the 1-D deferment.

All students who are in the regular Reserve or National Guard also are classified 1-D.

To qualify for a 2-S classification, a student must be pursuing

a full-time course of instruction toward a baccalaureate degree at a college, university or similar institution of learning. (A full-time course of instruction is 12 semester hours in the fall and spring semesters, and five hours in the summer session.)

This deferment continues, a year or less at a time, until a student graduates, fails to pursue his degree full-time or reaches his 24th birthday, whichever occurs first.

The student is responsible for providing pertinent information to his draft board concerning his school progress. His school, upon request, will notify his board on printed forms prepared for this purpose.

Any graduate student who is satisfactorily pursuing a course of graduate study in medicine, dentistry, veterinary medicine, osteopathy or optometry, is available for 2-S classification.

Student Exemption

After a student receives an order to report for induction, he is eligible to be classified in 1-S(C).

If at the time a student is ordered for induction, and he is sat-

isfactorily pursuing a full-time course of instruction in school, his draft board must classify him 1-S(C), that is, if he hasn't been placed in 1-S(C) previously.

If a student has been deferred under 2-S classification since June 30, 1967, and has graduated, he is not entitled to the 1-S(C) classification.

A student remains in classification 1-S(C) until he ceases satisfactorily to pursue a full-time course of instruction, or until he graduates, whichever comes first.

According to the Texas Headquarters of Selective Service, students not pursuing study leading

to a baccalaureate, such as students in business colleges, or vocational or technical schools, can be considered for class 2-A if they are receiving instruction a minimum of 25 clock hours a week in day or night classes.

Junior college students taking courses that terminate in two years or sooner, are eligible for classification 2-A, but junior college students planning to achieve a baccalaureate are eligible for classification 2-S.

A pre-divinity, divinity or ministerial student is the only student exempted from service in the armed forces.

9 Traineeships Offered For Special Education

Nine holders of Texas Education Agency-sponsored traineeships will enroll at TCU in June to work toward provisional certification in special education.

The 1968 summer session will be the second year that holders of the state agency's awards have participated in the University's special education program, headed by Dr. Wyatt Stephens.

The traineeships, made available to the TEA through the U.S. Office of Education, are for six weeks of summer school work in courses of professional content. Each recipient holds a minimum of one academic degree and is now teaching in a public school in Texas.

To study specifically in the ar-

ea of the mentally retarded are Mrs. Doris S. Kahn, Fort Worth; Mrs. Imogene Buss Bell, Mansfield; Mrs. Carol Johns Stephens, Crowley, and Miss Mary Anne Rich, Ralls.

TCU's courses in special education will be offered during the first summer term, beginning with registration on June 3. The program will include an introduction to special education, exceptionalism in the mentally retarded, educational programs for special learning disabilities and a workshop in language.

Dr. Stephens said that planning is now underway for TCU to offer professional certification in mental retardation.

Recitals Set By Organists

Two senior music majors will come a step closer to Bachelor of Music degrees by presenting their senior recitals.

Larry Brooks McCain, Arlington, and Susan Ingrid Ferre, Fort Worth, will give their recitals May 7 and 8, respectively, in Ed Landreth Auditorium at 8:15 p.m.

Miss Ferre, a church music major, was recently awarded a Fulbright scholarship to pursue graduate study in Paris.

Besides receiving her music degree Miss Ferre will also take a B.A. degree in philosophy at the August commencement.

Miss Ferre was named senior scholar for her outstanding achievements in philosophy.

After a year in Paris she plans to attend Eastman School of Music to work toward her masters degree.

She is the daughter of Dr. and Mrs. Gus Ferre of 3004 Alton Rd. McCain, an organ major, is a transfer student from Howard Payne College in Brownwood. He is studying with Emmet Smith, associate professor of music.

McCain was named to the Dean's list for his academic achievement last fall.

Both programs will be opened to the public free of charge.

Band 'Turns On' Area Schools

By RON GEORGE

In the spring of each year, the Symphonic Band packs up just about anything that doesn't move out of the way and shares its musical expertise with a number of Texas high schools.

This year's spring tour covered the North Texas area and undoubtedly produced all the unexpected and necessarily attendant headaches of any musical aggregation playing three concerts a day with divided thoughts of the measure they better not miss and the exams that they will have to miss.

Touring has its rewards despite all the confusion and stomach trouble from eating on the run. A standing ovation from over 2000 enthusiastic high school students somehow makes those hot, uncomfortable concert uniforms bearable.

Monday morning found the 70-man Symphonic Band shaking off the effects of early rising in order to play their first concert at Haltom High School. The second concert was at Richland High and was sufficed by some mass production repast (no rest from cafeteria food) and a jaunt to Dallas and a two-hour rehearsal.

Evening Concert

A concert followed that evening at W.T. White High School for band students from Carrollton and Hillcrest, their parents, interested TCU alumni and anyone else who happened to wander in. A standing ovation climaxed the concert. Band members were ushered to homes for home-cooked meals and a well-deserved rest.

Tuesday began with a short

refresh of "yesterday's mistakes" and a concert in Nocona.

In Henrietta, recently endowed with a new auditorium, the band was reminded of their academic status with a test administered by Ed Cornelius, a band member and senior psychology major.

Their emotional stability was not in question (although it might well have been under the circumstances), but rather the effect of band activity on the average student. Results of this survey have not yet been made public.

Wichita Falls was the last stop of the day. The Band was hosted by all the high schools of the city (Rider, Wichita Falls and Hirschi). A prolific supplier of TCU bandmen, Wichita Falls received the concert with ardent enthusiasm and a standing ovation from over 2000 assembled students, including band students from Burnett High School.

Final Concert

The final concert of the tour was performed in Graham.

The Band arrived home Wednesday afternoon at 5:30. The 70-

man entity scattered to their separate pursuits only to appear once again in concert Sunday afternoon.

James Jacobsen, director of university bands, termed the tour "a hard trip." "We did a lot of playing," he said. The music was the hardest ever performed by a TCU band. "Most of it was class 4-A," said Jacobsen.

The music played on the tour was the same performed in last Sunday afternoon's concert. It included such works as Leonard Bernstein's "Overture to Candide" and Aldridge Grainger's "Lincolnshire Posy." Also included in the Sunday concert was featured guest artist, and former TCU student, Don Giordano.

Jacobsen said the tour this year was an improvement over last year's tour. "The band did a much better job," said Jacobsen, "despite the difficult music."

A feature of last year's tour notably absent this year was the ensemble selections. The University Stage Band did perform, however, to the delight of the North Texas audiences.

Yea, Verily

Marv Lauds Old Teams

By PETE KENDALL

Ten years ago Marvin Lasater streaked through the line, mostly by himself, and traveled 52 yards to the SMU five yard line where for some reason he stopped. Then, with Mustang defensive back Charlie Jackson at his heels, he planted a stiff-arm in the Pony's face.

Lasater is not quite so swift now, nor is he as thin. And he is probably less outgoing. He has learned. The Jackson episode was in 1957 here, but two years later, Lasater was a more experienced, much wiser ball player. He had been an all-conference performer in 1958, but injuries had bothered him his senior year.

Then in his only try-out for the pros the following fall, he was cut by the last team, the Oakland Raiders, to enter the AFL under the original charter. "I was just outclassed. They had some good boys up there, most of them with more experience than me," he said. "A lot were Canadian ball players or NFL boys who had played out their options."

Still, Lasater cherishes a lot of memories from the last Frog football team, 1958, to go to a Cotton Bowl. "That was some kind of team," he said. "We were more or less just adequate on offense. Still good, but for these times just adequate. Where we were really best was in the defensive line. Guys like Joe Robb, Robert Lilly, Don Floyd, Sherrill Headrick, and Roy Lee Rambo could really belt you."

Aggie Game Cited

There were other instances Lasater will not recall unless pressured. In one of the bloodiest, biggest grudge games of the last decade, Texas A&M (Bear Bryant era, 1957) had come to Fort Worth for a rematch of the Aggie 7-6 1956 win. The longest gain had been no more than ten yards all day. Lasater veered outside at midfield to throw the halfback

Lambda Chi's No-Hit Sigs

Gary Domm blazed a no-hitter past the Sigma Chi's Wednesday to intrench the Lambda Chi's in first place in the Greek intramural softball league.

The Lambda Chi's, undefeated in their first four outings, are trailed by the Deltas who tightened their hold on second place with a 17-3 rout of the SAE nine. The win placed the Deltas in second with a 3-1 record and dropped the SAE's into a four-way tie for third with the Phi Deltas, Phi Kap's and Sig Ep's all with 2-2 records.

The Phi Kaps pushed the Kappa Sigs deep into the cellar with a 16 to 1 win and the Phi Deltas rolled by the Sig Eps 8-4 in other games last week.

Sigma Chi's loss to the Lambda Chi's dropped them into seventh place in league standings with a 1-3 record.

option pass, had it batted back in his face, managed to catch it himself, then ran downfield for one of the game's more exciting plays.

Against Rice in 1958, Lasater recovered a Billy Bucek fumble in the air, and ran 55 yards untouched for a score.

He recalls Rice from the year previous in 1957. That's when Lasater was a sophomore, a little cocky, possessing just enough football knowledge to think he could cover King Hill or Frank Ryan to Buddy Dial passes.

"It was near the first of the game," Lasater said. "Jim Shofner who played behind me at safety came up and told me, 'Lasater, be sure to give ol' Dial plenty of room. He'll dog it on you, then shoot by for a long pass if you let him.' Well, I figured I could handle Dial and, sure enough, he shot right by me the very next play and Shofner had to knock the pass away in the end zone. I always listened to Jim after that. He was a pretty fair defensive back." Shofner went on to play for years in the Cleveland Browns' defensive backfield.

Walter Roach coached that Frog defensive backfield which also included Jack Spikes and Richard Finney. Lasater gives a lot of credit for his coaching to Roach. "He was a good coach. He was a real fine person who didn't get shook and had a lot of poise. His confidence and pride always carried over to the players," Lasater said.

Good Defensive Backs

Lasater likens this year's group of defensive backs to the late 1950's editions. "I think we have the type defensive backs this year," he said, "who will do a good job. They now have the experience and the poise. You could tell that the way they came on last year. They intercepted only one pass in the first five games last year then got ten in the last five. They really came up with some key saves."

Mentioned prominently in that group are Mike Hall, Billy Lloyd, Charley Brightwell, Billy Fondren, and Robby Mayfield. "Defensive back is the toughest position on the field in my opinion," said Lasater, "but these guys have all the tools."

To those fans who ask if TCU will have the best defensive backfield in the conference next year, Lasater says, almost like his old self, "You'd like for me to say that. But we can be up there near the top. Watch out for A&M though. We may have made 11 interceptions, but remember, they had 27."

Certainly, Lasater won't be the only one watching the Aggies. The conference office is already doing that.

Owl Commits For Wallace

Hang Loose, Aggies

By PAUL RIDINGS

This is "Be Nice to Aggie Week" for the TCU baseballers.

Texas A&M must defeat Texas at least once in their two-game series this weekend in Austin to send the Horned Frogs to the College World Series in Omaha, Neb.

If Texas A&M does win one of the games, the Longhorns and the Christians would be Southwest Conference co-champions. Since TCU zapped the Steers in two of the pair's three meetings this spring, the Frogs would go to Omaha.

If the Aggies win both, TCU would be outright champion, A&M finishing a half-game behind the Frogs since the Aggies will have played one less game due to a rainout. Should Texas sweep the series, the Horns would be champs again.

After downing Texas Tech three times last weekend, TCU finished the year with a 20-8 season record and a 13-5 conference record. Currently the Frogs are in a virtual tie for first place with Texas. The Longhorns own a 12-4 record.

Last Three Won

Powerful hitting and pitching won TCU its last three conference games here Friday and Saturday afternoons. The Frogs compiled a total of 29 hits and 16 runs as they downed Texas Tech 3-0, 7-2, and 6-2.

In the first of Friday's two contests, TCU pitcher Mickey McCarty held the Red Raiders hitless for five innings as tremendous fielding plays by Jerome Hall, Rick Rickard, and Dick Turner foiled certain Raider hits.

But two consecutive short-distance knocks—one which fell in on the outer fringe of the infield and the other a well-placed bunt—ended McCarty's chance for a spot in the conference record books. Only seven league no-hitters have ever been recorded.

The triumph was McCarty's fourth in five decisions this year. Mickey struck out six Red Raiders and walked only three.

A balk by Tech pitcher Donny Abbott broke a scoreless tie in the fourth inning of the game.

The balk brought home Turner from third base.

Bill Ferguson's single to center field scored Eddie Driggers in the next inning. Driggers had been walked and had stolen second base.

Jerome Hall added the third Frog run in the sixth inning as he scored on a Tech error after getting on base on a single.

In the second game Friday, Turner and McCarty's strong bats powered TCU past the Red Raiders 7-2.

Turner Clouts Pair

Turner smashed two-run home runs in both the first and third innings. McCarty's triple in the first frame scored Driggers and Ferguson. Mickey also scored TCU's last run in the eighth inning after singling to center field. He tallied on Hall's grounder to second base.

Chuck Machemehl was the winning pitcher for TCU. The right-hander allowed Tech only six hits and one base-on-balls. The victory brought his conference record to 5-0, the best mark in the league.

Saturday afternoon the Frogs bombed the Raiders for more hits than in both games Friday. TCU collected 15 base knocks.

Claiborne Wins Golf In Loop Wrap-Up

Jess Claiborne held off a late charge by Texas Rik Massengale to take the Southwest Conference Golf championship at Glen Garden Country Club Friday.

Frog Jess Claiborne shot a 284 for 72 holes. Massengale finished two strokes behind. Jess entered the last round with a huge five-stroke lead after a hot 69 morning round. However, Claiborne came in with a 75 to close out the day. Massengale could do no better than a 71 in the afternoon round.

Robert McKinney, the defending golf champion, shot a tired 293 and finished well back in the field at number eleven. Chip Stewart of Texas, another favor-

Ferguson and Turner were the Christians' most vicious sluggers. Ferguson hit safely all four times at bat while Turner went three for five.

The Frogs were never in trouble, taking a 1-0 lead in the first frame and expanding it the rest of the way. By the time Tech scored its first run in the seventh inning, TCU had scored all six of its runs.

Driggers scored the first Frog run as he came home from second base on Larry Peel's double to left field.

Jeff Newman's double to center field in the second inning scored Hall and Driggers. Wayne Morrison's sacrifice fly to right field brought in Turner in the third.

Driggers' single in the fifth inning tallied Hall. McCarty added the last run in the sixth frame, scoring on an error by the Texas Tech catcher.

Newman was the winning pitcher. The sophomore right-hander relieved starter McCarty in the second inning. Jeff allowed only six hits and two bases-on-balls. Neither Tech run was earned.

The victory was Jeff's second in as many decisions in conference play this season.

ite in the tourney, skidded to a 77 in the last morning round and finished well back at ten.

The Frog tennis team did not make it to the finals and the track team scored but four points at Farrington Field.

Robert Nees high jumped 6-6 for third place. Jim Napier threw the discus 159.9 for a fifth.

Texas scored 66 points to win the Southwest Conference Track and Field Meet. In second was Baylor with 54. In third was Rice with 37. In fourth was Texas A&M with 34. In fifth, sixth, and seventh were SMU, Texas Tech and Arkansas with 28, 19 and 14 points respectively. TCU finished eighth with four points.
