SPC adopts magazine policy

By JUDY BERRY

The Student Publications Committee (SPC) voted Tuesday to adopt a set of guidelines for the publication of "The Horned Frog" student magazine.

The proposal, drawn up and approved by an ad hoc committee of the SPC on Feb. 18, was submitted and approved by the full SPC.

As submitted by Jim Lehman, chairman of the ad hoc committee, the guidelines offer a compromise between the traditional "Horned Frog" annual and the "Image" magazine.

The guidelines call for "The Horned Frog" in a "magazine format" that, "circumstances permitting" (financial and otherwise) "be published periodically, with at least four and possibly five issues during each academic year."

"The annual would be published on a formalized basis, rather than through groups such as the Bryson Club. It would actually be 'The Horned Frog' and would conform to what many students want. Then, an evaluation would determine if the project was worth continuing," Lehman said.

One section of the guidelines was a point of much discussion by committee members. It states that an issue or issues of "The Horned Frog" must contain photographs of campus organizations and classes or departments.

Lisa Deeley Smith, news editor of the Daily Skiff, said

this clause infringes on the editor's responsibility and freedom which are allowed in another section of the guidelines.

Lehman said the intent was not to take away from the action shots of campus activities, but to "give an opportunity for a more formal picture which would provide nostalgia and a future source of pride to the subscriber."

"Let's give it a try and see what kind of response we have. If it's worth continuing, we'll do so; if not, we'll drop it," Lehman said.

Doug Newsom, "Image" faculty advisor, said each department and organization will be written by the "Horned Frog" staff at the beginning of the school year and asked to send in its own pictures by a Dec. 1 deadline.

Each department and organization will arrange for its pictures to be made, meeting "Horned Frog" editorial standards, and will then send them to "Horned Frog," Newsom said. "There will be no restrictions other than technical and the standards of good taste," Newsom said.

Nick Clift asked for a rewording of this section of the guidelines.

Bruce Gibson, Bryson Club president and a member of the ad hoc committee, said the only point of compromise between the "Image" and "The Horned Frog" was contained in the portion of the guidelines under question. "To soften this point would be to keep everything as it is," he said.

Gibson said the guidelines do not contain "everything I

had hoped for, but in the spirit of compromise I accepted it."

Addran Dean William M. Wiebenga offered an addition to this portion of the guidelines, which stated "Guidelines for having photographs taken and publication of submitted photographs shall be developed and distributed by 'The Horned Frog' staff in consultation with the faculty advisor."

In addition, the guidelines state that the editor and staff of "The Horned Frog" will follow the purposes outlined for its publication in the policy statement of the SPC.

The policy states that the editors and staff of "The Horned Frog" should "regard their roles as partially those of a trust. The publications should not be held to belong only to the student editors and staffs, but as well to belong to the general student body and to the University as a whole and as a traditional and historical entity."

Further, the publication is "to offer a lively portrayal of University activities and to constitute a present and future source of pride to the subscriber. It should represent the University and its activity from a campus-wide point of view."

The statement reads that the SPC "designates the student editors of these publications as having editorial responsibility and choice regarding their contents so long as materials chosen for publication are consistent with the Canons of Journalism, the policy of this committee, and community standards of taste."

Women's Week continues

Miller to speak in favor of ERA

State Rep. Chris Miller will speak tonight in favor of the Equal Rights Amendment (ERA) as a part of the University's observance of Women's Awareness Week.

She will speak at 8 p.m. in the Student Center Ballroom, opposing the current movement in the Texas Legislature to rescind the state's approval of the amendment.

Last night, the Co-Respondents presented their own production, "Battle Ax."

The United Nations has proclaimed 1975

"international Women's Year" with the theme, "Equality, Justice and Peace."

Barbara Hall, publicity chairperson for Women's Awareness Week, said the week is a time to concentrate on the accomplishments women have made during the past year and to be more aware of possibilities for the future.

Dr. Nell Senter, who teaches "Philosophy and the Liberation of Women," said women have made gains at the University in recent years but they still have "a long way to go" towards full equal rights with men.

There is still a great deal of evidence that women on the faculty and staff, as well as among students, are being discriminated against, she said.

"But at least now, when a speaker at a banquet introduces someone as chairperson, people in the audience don't giggle like they used to," she added.

Female faculty members should get equal pay with the men who hold the same positions, said Cathy Mabee, president of the campus chapter of the Association for Women's Awareness. There should be more women in high administrative positions in the University, she added.

Mabee and Hall said they look forward to the establishment of a women's center on campus—a place where men and women could come to get pamphlets, books, birth control information, literature about women's rights and referral services.

Mabee said she wants the center to be

separate from Campus Ministry and the Center for Psychological Counseling and Testing. "When you have to go to one of those places, you feel like you have a moral problem or that there is some-

thing wrong with you," she said.

Hall said she hopes it will be a "consciousness center," where women can come to learn about themselves and their place in society.

SC check-cash resuming soon

Check-cashing services at the information desk in the Student Center should resume next week, according to Don Mills, director of Programs and Services.

The services were discontinued after two successive burglaries on the safe at the information desk which amounted to a loss of \$635. The burglaries occurred Feb. 21 and 24.

"Until we determine how access to the safe was gotten, we are reluctant to put any money in it, and therefore there is no money available to cash checks," Mills said.

Investigations are being conducted by the University and the Fort Worth police, according to Mills.

THE CO-RESPONDENTS (two of whom are pictured above) conducted a workshop yesterday afternoon in the Coffeehouse, and were scheduled to perform "Battle Ax" last night. The singing and acting trio performed cuttings that commented on the role of women in society.

Enforcing rules is RA's job ★

Role is useless without authority

The saying in sports goes: "Records were made to be broken." Apparently, however, several University students have reworded that adage to read: "Rules were made to be broken."

Two examples of this attitude have been revealed this week in the chastised pages of the Daily Skiff.

Yesterday, in her letter to the editor, Julia Veach said one of the reasons the Chancellor's second housing option was rejected by

TB-J was that "each resident might have to sign a contract promising to obey all University rules and regulations."

Well, that is asking a lot. But we'll deal with that at a later date.

The other example was reported in Tuesday's edition in a story headlined, "Authorities' roles under fire in Clark."

It dealt with the incident of an RA telling a resident to stop knocking on a door in his section at 1 a.m. and return to his room.

The resident refused.

Harry McClintock, a member of Clark's standards board, was quoted as saying, "To enforce the rules only cultivates more hostility."

We disagree. We feel that residents who are mature enough to abide by the rules they automatically agree to when they sign their housing contracts will not be hostile when those rules are enforced.

Rules exist to protect the rights

and privacy of others. Certainly, the usefulness of some University regulations may at times be questioned, but as long as they exist, the student has an obligation to live with them, or change the ones that have become outdated.

If the enforcement of rules leads some students to hostility, it is not necessarily the former which must be re-examined, but the latter.

It is the responsibility of the RAs and ultimately the hall director of each dormitory to live by and enforce the rules the University has established.

If the RAs and hall directors fail to do so, they are not living up to the terms of their own contracts. If they are not required to do so, they serve no purpose in the dormitory.

The Daily Skiff, student newspaper at Texas Christian University, is published Tuesday through Friday during class weeks except review week, final week and summer terms. Views expressed are those of the students involved and do not necessarily reflect administrative policies of the University. Third Class postage paid at Fort Worth, Texas. Subscription price \$4.

Daily Skiff Letter Policy

The Daily Skiff welcomes reader response in the form of letters to the editor or guest editorials. All letters must be typed, double spaced and should not exceed 200 words. Letters must be signed with name and classification or title.

Guest editorials must meet the same requirements and cannot exceed 500 words. Topics for guest editorials should be cleared with the associate editor in advance.

Why everybody's pretending they're us.

There was a time when the EARTH[®] negative heel shoe was the only shoe in the world with the heel lower than the toe. In those days the other people who made shoes just laughed at us.

But things have changed. And now that you love our Earth brand shoes so much, the shoe companies have stopped laughing and started copying.

But what they don't understand is this. Merely lowering the heel of a shoe isn't enough. And imitating the outside of our shoe isn't enough.

Just because a shoe looks like the Earth[®] shoe doesn't mean it works like the Earth shoe.

It took many years to perfect the Earth brand shoe. To get the arch just right. To make the toes wide, comfortable and functional. To balance the shoe. To mold the sole in a special way so that it will allow you to walk in a natural rolling motion. Gently and easily, even on the hard jarring cement

of our cities.

And the Earth shoe is patented. That means it can't be copied without being changed. And if it's changed it just isn't the Earth shoe.

So to be sure you're getting the Earth brand shoe, look on the sole for the Earth trademark and U.S. patent #3305947.

You'll be glad you did.

Shoes, sandals, sabots and boots for men and women. From \$23.50 to \$42.50.

It will be a powerful sun of a switch

By ROBERT ROBBINS

The energy crisis may not be solved overnight, but one possible answer may be the use of solar energy, according to Dr. A.A.J. Hoffman, professor of physics and mathematics.

Dr. Hoffman said if two per cent of the land area in the United States was used for solar energy conversion systems, it would supply all of the nation's energy needs.

Dr. Hoffman is in charge of a project, funded by the National Science Foundation, to investigate the possible use of solar energy at Fort Hood military installation.

This study is one result of "project independence," which is designed to make this country independent of foreign energy sources.

Dr. Hoffman said military bases use large amounts of

energy and compete with the civilian population for energy sources.

The advantages of solar energy are that it is non-polluting, self contained and does not have a problem with public acceptance, he said.

The problem with this energy source is that it stops for a period of time because of the day-night cycle and it is influenced by the weather, Dr. Hoffman said.

He explained that the earth radiates very little at night so not much energy can be collected at this time. Also, the systems which collect solar energy cut off when there are clouds or rain.

But sunshine is more available during the summer when energy needs are greatest, he said.

Dr. Hoffman set up energy measuring equipment at Fort Hood and examined electrical usage patterns. It was found that housing and dining facilities consume half the energy used by the base.

Similar to the nation's projected needs, he estimated a 10 per cent increase in energy needs at the base each year.

Dr. Hoffman said as more people become affluent, the demand for air conditioning grows, thus increasing energy demands.

Dr. Hoffman said physicists have to be practical because of national energy needs. He said

solar energy is a challenging field and research is well funded.

Fine Arts fest ends with Kraus recital

A piano recital tonight by Madame Lili Kraus, artist-in-residence, will be the final event of the 34th annual Fine Arts Festival.

The program includes Haydn's "Andante con Variazioni in F Minor," "Sonata No. 37 in D Major" and "Fantasia in C Major." Also, Mozart's "Adagio in B Minor" and "Variations on a Theme" by Gluck will be performed.

Following intermission, Madame Kraus will conclude the program with Schubert's "Sonata Posthumous in A Major."

The recital, which begins at 8:15 p.m. in Ed Landreth Auditorium, is sold out. However, those without tickets may fill unclaimed seats for the performance at 8:10 p.m.

House votes to remove 'W', 'I'

Transcript change passed

By BROCK AKERS

A bill calling for the omission of withdrawal and incomplete designations from grade transcripts was passed by the House of Student Representatives Tuesday night.

In presenting the bill, Steve Saunders, chairperson of the Academic Affairs Committee, said the withdrawal and incomplete designations do not provide accurate information regarding the student's performance in the course.

"The 'W' or 'I' designations have derogatory connotations and do not reflect the reasons for withdrawal or incompleteness of the student," said Saunders.

In other House action, a bill supporting freedom of academic expression was passed. Citing a recent announcement by the SMU administration that all statements by the SMU community would be censored, the bill indicated the TCU House's dissatisfaction.

Bob Hampton, the only House

member against the bill, said, "I'm against asserting our opinion 30 miles down the road. We should confine our opinions to what is happening here at TCU."

Defending the bill he presented, Saunders said, "It is the duty of other academic communities to condemn such action taken by any university."

A bill to sponsor a seminar room in Winton-Scott was passed by the House. The legislation calls for an allocation of approximately \$700, or 50 per cent of the estimated construction costs from the Permanent Improvements Committee budget.

Jim Paulsen, chairperson of the committee, explained that the allocation of student funds would be used as pressure on

other sources to hurry things along to get construction under way in Winton-Scott.

In other action Tuesday night, the House passed a bill favoring coordinated vacation breaks. The bill calls for the House to request the time period for vacation breaks be scheduled to coincide with vacation breaks of other Texas schools.

The extramural funding proposal, adopted by the Finance Committee earlier in the day, was passed by the House. The allocation of the \$3,000 extramural fund gave \$1,281 to the debate team and \$746 to the judo team. The Association for Women's Awareness was granted \$515 and the bowling team will receive \$307.

DRIVIN' THROUGH—Horned Frog guard Rick Hensley (15) drives through the lane in Tuesday night's 89-61 plucking of the Rice Owls. Hensley tossed in 15 points on the evening.

Senior cagers say 'adios' in grand style

By TOM BURKE
Assistant Sports Editor

If you can't go out with a winning season, the next best thing is to leave with a win and that's exactly what five senior Horned Frog cagers did Tuesday night, as the Purples destroyed Rice 89-61.

It was "Fan Appreciation Night" at Daniel-Meyer Coliseum, but only 2,156 fans showed up to see the Frogs make their final home appearance of the season.

From the very start, it looked like Rice was in for a long evening as the Frogs scampered to an early 11-point lead. Head coach Johnny Swaim started an all senior lineup consisting of Bill Bozeat, Teddy Jones, Alonzo Harris, Eddy Fitzhugh and John Blakney.

Led by Gary Landers and Rick Hensley in the first half, the Frogs carried a 36-25 advantage into the locker room at intermission with both Landers and Hensley scoring 10 points in that opening period. Landers captured game-high scoring honors with 21 points, while Hensley ripped the nets for 15.

The Owls played a 2-3 zone on defense, but the Frogs had no trouble penetrating the lane. But when they couldn't get inside,

they hit from the outside, totaling 46.7 per cent from the field.

Another plus for the Purples was their sticky defense which covered the Owls like a blanket. The Birds shot only 36 per cent from the field, as they never could break the Frogs' 1-3-1 zone.

"I thought we played real good defense," Swaim said. "I was able to grin a little bit with about three minutes left.

"I'm glad the seniors won their last game here. They are a good bunch of seniors and they really had a good attitude," Swaim added.

Things really got out of hand in

the second half as the Frogs rolled to a 33-point lead late in the game. By this time Swaim had emptied the bench, and all but one Purple scored.

Senior co-captains Harris and Fitzhugh were pleased they went out with a win. "This was a token win. We had a bad season so it's good to win the last one for the fans," Fitzhugh said.

Bozeat, who grabbed a game-high 15 rebounds, also expressed his satisfaction. "It feels good to win. We didn't have too much pressure on us, so we could go out and run while we played our game. We really wanted to win our last one here," he said.

Frog tankers ready for SWC swimming and diving meet

Breastroker Mike Epperson and freestyler Bryan Austin will spearhead an eight-man TCU team in the Southwest Conference swimming and diving championships March 6-8 at the University of Houston.

Epperson qualified for the nationals two years ago as a freshman and tank coach Rufe Brewton feels the Fort Worth swimmer has regained that form. He has a career best of 1:01 for the 100-yard breaststroke which would rank him fourth in the SWC to date this season. He has a best clocking of 1:02.68 for the current campaign.

Austin could contend in both the 100 and 200-yard freestyles. He has bests of 48.2 for the 100 and 1:47.1 for the longer event.

"I feel that Epperson and Austin both should qualify for the national meet," says Brewton. "Austin has been unbeaten in the 100 free in dual meets this year."

From pigskin to horsehide?

Gridders invade mound

By FRANK HOUX
Sports Editor

A lot has been made in area newspapers of late about how much Baylor football players have bolstered the Bruin track team. Scooter Reed, Ricky Thompson and Alcy Jackson, all migrated from the grid squad to join coach Clyde Hart in his track chase of the University of Texas.

Has anyone taken a good look at Frog baseball coach Frank Windegger's pitching staff lately? Three of Windegger's mound mainstays are refugees from Purple football ranks.

One of those, freshman quarterback Rueben Tomlin of Arlington Sam Houston, went out to the mound Tuesday and proceeded to pitch himself a no-hitter.

Another gridder, knuckleballer Ed Owens of Hitchcock, leads Frog hurlers with a smooth 0.539 ERA.

Senior Chad Utley, who picked up the win in Tuesday's first game, spent most of the fall busting noggins with enemy running backs at his defensive end position.

Tomlin ranks third on the ERA list with a 2.7 mark, but non-football star Steve Phillips, a freshman from Fort Worth

Western Hills, is second with a neat 1.929 allowance.

Ed Owens will start the first game of this weekend's SWC series here against the University of Houston. Tomlin has earned the start in the first game of Saturday's doubleheader against the Cougars, but Windegger is still in doubt of a choice for the second game.

Currently, Mike Turner of Fort Worth Eastern Hills, leads Frog hitters with a .441 average. Injured Danny Twardowski, is still questionable to start the Houston series, trails at .412.

Gene Burton is clipping along at a .381 clip, while Tommy Crain is hitting .378.

Pan Am meet sets two for nationals

At the state women's collegiate swim championships held in Edinburg last weekend, Frog swimmer Sue Marks qualified for the national meet, and the ever-amazing Linda Newell qualified in yet another event.

Going into the Edinburg meet, held at Pan American University, Marks was only .1 of a second off the national qualifying standard in the 50-yard butterfly. Marks met the required time, and will participate in the nationals March 14 and 15 in Tempe, Ariz.

Newell already had qualified for the nationals in the 50 and 100-yard backstroke, and proceeded to set new state records in both events.

The all-American also won in the 50-yard butterfly.
