Mr. Amon G. Carter  
c/o Fort Worth Star Telegram  
Fort Worth, Texas.

Dear Amon:

I would like very much, indeed, to build the bomber assembly plant to be erected in Fort Worth.

Things are shaping up for us in Abilene with very great speed, and it looks like five weeks will have 90% of the camp completed. Should we accomplish this feat, it will be the fastest piece of work done on any Camp in the United States.

The splendid organization we have organized to do this \$5,000,000 job will be available for moving to this job here. The largest part of the work on this new plant in Fort Worth will consist of steel frame structure. The North Texas Iron and Steel Company of this City have associated themselves with the Illinois Steel Bridge Company of Jackson, Illinois, and these two firms would be in excellent position to handle the steel frame in fast time. I am calling this to your attention because the steel frame of this bomber assembly plant will be the largest part of its cost and the slow part of the construction. The rest of the work will be easy.

My understanding is that the owners of the factory will have control of the awarding of this contract, and knowing how you feel toward Tom and me, and also knowing that you fully understand that, when speed in completing a contract is required, I have never yet failed to finish on time, I would thank you for anything you may say for us.

Re: bomber assembly plant.

If at any time you would be interested in looking over the Abilene job, I should be glad to pick you up and take you out. It is really a most interesting piece of construction, particularly when it is going in a splendidly co-ordinated manner, as it is doing. About two weeks from now would be the time to see this job.

Again thanking you for anything you might be able to do for us, I beg to remain

Yours very sincerely

JTT:vh
