Fort Worth, April 18 (UPI).—Ground breaking for a $10,000,000 Consolidated Aircraft bomber assembly plant here brings Uncle Sam’s defense program and the long-dreamed industrialization of the southwest one step nearer reality.

A score of prominent army and navy officials were here today to snap up a shovel of dirt at the 1400-acre site near beautiful Lake Worth.

Here in this cow town where close to 200,000 have tuned their lives to the easy-going manner of the cattle country, the ceremonies today harken a new era that most expect to transform the rural metropolis into a top-flight southwestern industrial center.

The initial shot in the arm from Consolidated will bring a payroll of more than $1,000,000 monthly to more than 15,000 employees at the peak of productivity. The factory will manufacture four-motor bombers of the B-24 type from parts pre-fabricated at large industrial plants in the east and northern mid-west.

Speakers to Be Heard

Ceremonies at the plant today follow close on an announcement of a new army air training school expected to be built near the bomber plant. Brig. Gen. G. C. Brant, commander of the Gulf Coast Air Corps training center, Randolph Field, one of the speakers here today, made the recommendations to the War department in Washington yesterday.

Consolidated’s plant here starts construction a few weeks before another plant awarded to Tulsa and follows the completion of the first large airplane factory in the southwest—the North American plant near Dallas.

Other speakers today included Col. William B. Wright, commander of the Merefield, Miss., air base, who will represent several high-ranking army officials; Capt. Albert S. Lowe, vice president and chief engineer of Austin Co., contractors; and Col. Lawrence Westbrook, assistant WPA commissioner; Col. S. O. Scott, Dallas; Albert S. Lowe, vice president and chief engineer of Austin Co., contractors.

Amon Carter, well known Fort Worth publisher, will preside at the ceremonies. Austin Co. offered to lend the group a steam shovel for the ground breaking—‘Son, you could really get some dirt’—but the novel idea was vetoed in favor of a gilded hand-spade which may be kept as a memento of the occasion.
