NEW B-24 BOMBER PLANT TWO MONTHS AHEAD OF SCHEDULE

90 Fort Worth, April 20 (AP).—The B-24s are coming!

Southwest-assembled long-range bombers are rolling off elongated assembly lines and winging their way to the world's battlefronts.

Commemorating completion two months ahead of schedule of the Consolidated Aircraft Corporation's bomber plant, the Fort Worth Star-Telegram yesterday issued a 188-page special edition.

In a front-page Washington-dated story, the newspaper reported that the war department hailed the achievement as an outstanding job, resulting from the accelerated war production program.

Consolidated turns out four-motored B-24 bombers.
