Airplane Plant Finish Is Told

90
FORT WORTH —(A)— The Fort Worth Star-Telegram commemorated in a 188-page special Sunday edition the completion of the Fort Worth Consolidated Aircraft Corporation's bomber plant—two months ahead of schedule.

In a front-page Washington datelined story the paper reported that the War Department hailed the achievement as an outstanding job, resulting from the accelerated war production program.

Consolidated turns out four-motored B-24 bombers, and a section of the special edition detailed in pictures how they are built.

Every workman on the job of building the huge plant received a letter of commendation.

The Star-Telegram's combined afternoon - morning circulation is the largest in Texas, rated at more than 175,000 daily.
