

MEMORANDUM

Within this folder is listed the construction scheduled and the construction desired but not programmed by higher headquarters.

1. Inclosure I. Includes in priority, determined by this command, items of construction which are desired and needed but not programmed by higher headquarters.

2. Inclosure II. Includes all items of construction for the 3rd Supplemental Construction Program for FY 1951 and FY 1952. (1 July 1951 to 30 June 1952). Informal information indicates that all of the items listed on this inclosure have been approved with the exception of: (1) Dental Clinic; (2) Base Operations; (3) Fifty percent (50%) of the warehouse square footage originally proposed; (4) Thirty (30) Family Units (appropriated housing).

3. Since the Third Supplemental Construction Program (Inclosure 2) is presumably scheduled with the exception of the four items mentioned above, the desired construction not programmed (Inclosure 1) is pending action. If priorities are required for the desired construction not programmed, it is recommended that items 1 through 15 be included in the Third Supplement FY 1951. Items 16 through 23 to be included in FY 1952 construction program.

4. It is desired to point out that the facilities presently being modified at this base for the B-36 program were originally built for a B-24 training group during the early part of World War II. It is imperative that immediate consideration be given to the desired construction not programmed so that these urgently needed facilities required to support the B-36 mission may be added to the Third Supplemental Construction Program. By providing proper facilities for this enormous program insures completion of the assigned B-36 mission.
