

Chief Editor Fort Worth Tex. 4/28/40
Mr. Amorbaty. 1430 Elmwood St.

Dear Sir:

Tell the 'blue bellies' to go
to hell; you damn right we are gonna
defeat this 'foreign advised' regime.

The damn cops even jumped
me up' The very day (last Sat) I left
for Houston to work - I didn't know it
here and I own a master mechanic -
the F. B. I. agent a Mr. Wolf called
mother (she is 70 has heart attacks, and
I left her alone) and stated "he was
looking for me" I got wind of it and
when I got back - he called me
stating "it is about a working blue
print of a machine gun you drafted"

I told him I had hid away the
blue print several years ago, and if he
had it. someone burglarized my files
to get it. Well he wanted me to come to
his office at his hours even if it did
break into my time. I also told him
I had started a deal (prior to Russia-
Germany war) to sell several electrical

Don't think of it Bill me & send
any more in your employ from what kind
of sitting a well; ask him about me.

devices of my own invention, to Russia;
I committed to tell him the truth in full.
That I didnt have a damned bit
of confidence in Washington Patent officials.

I submitted the magneto-compass
to the Washington crowd ~~in~~ April
1929; it turned up in General Electric's
hands. Figure that double cross?

I challenged for a toe to toe
technical duel; but not a prop out of
that Yankee crowd. That challenge
still holds, I can prove it with
documents I have hidden away.

I wish you would consult
with Gorgallus about allowing
me to carry some heavy artillery;
I am not afraid to use it.

By God I guess I am an American,
my father was an educated Scot
and mother a Bavarian, they have
relations back over a hundred years.

Very Sincerely

Grady B. Harris.

If we dont keep the spokes out of
the wheels, well we will be sleeping
and eating with muggers.
