O. B. Colquitt, one time rated as "Little Oscar," and former governor of Texas, is a much wiser man than some used to give him credit for being. Colquitt says that a special session of the Legislature should be called, that deficiency warrants can be issued, that members who fail to attend should be expelled and an election ordered in the districts to choose their successors. That is putting it strong but there are thousands of Texas people who believe just like Colquitt.
