RICHARD A. JAMISON,
BALTIMORE, MD.

NASAO

ADDRESS ALL REPLIES TO:

LEE TERMINAL
STANDIFORD FIELD
LOUISVILLE 13, KY.

Gentlemen:

This letter and the questionnaire, printed on the reverse side, is being distributed to all communities who have or who contemplate construction of a public airport. The primary purpose for this survey is to determine accurately the economic requirements of airports, nationally, which when disseminated to organizations and agencies concerned, will arm them with facts, heretofore lacking, to plan a sound national airport development program.

The three associations represented by this Committee are, by far, the majority of the personages and groups directly concerned with airport development. Their combined resources are being applied toward eliminating the inequities that have existed in past airport development programs. The results of this survey will help them immeasurably to achieve their objective, that of insuring the adequacy of airports serving civil aviation and for the role they play in our national defense.

Will you kindly execute the questionnaire on the reverse side of this letter and return it to us at your earliest convenience. Please include pertinent information applicable to all airports or communities under your jurisdiction or of which you possess knowledge. We expect some duplication which will be adjusted when compiling the survey. You can rest assured that the information submitted will be used with the utmost of discretion and then only to assist all to reach the desired objective. As usual, time is of the essence, and we sincerely hope to have all questionnaires executed and in our possession within 10 days. We invite your cooperation and will appreciate expeditious processing of our questionnaire.

Sincerely,

Henry P. Julliard, Secretary.
