

# The Crisis!!!!

One would think from the caption that I intend to describe some great and notable event that either has or is about to take place and thereby enlighten at least the ignorant and heathen with an eloquent flow of words and hyperbole that will thrill the hearts of the most deaf as to things so let him find he was greatly misled an attempt to offer a few state of affairs and the imaginary result; which I suppose might be termed The Crisis. But if I cannot benefit any one by my thoughts the question arises: why offer them. Merely because I cannot be silent on such an occasion.

Who can be silent! when every thing seems to be turned upside down; the waters are greatly disturbed; every man, woman and child are eternally asking and giving opinion on the momentous Question together with numerous other questions about the result of this excitement &c. I know what will be the result if no other by which a great many will be unbeneficially enlightened. What is we will find out in the public journals; and I begin to think at a few days why judge? Because that critical time will. Will not an youth who is strong

powers of his mind and of who knows but that there are many youths at this time who imagine it is not an impossibility for them to make a Washington during the great and bloody war which in the imagination of many is impending over a peaceful nation. There is nothing like trying. A good determination carried into prosecution will accomplish much. Therefore I say to every youth set

your mark high and "go ahead": inscribe your name  
upon the proud pillars of fame so that the rough hand  
of time can never obliterate it. To be continued  
A. Clark?

with is a handkerchief marked "The Doctor". "You perceive that when the ad. now is so far pervaded by a superabundant application of oleaginous, acidulous, piperine, mustardic, vaporous components of a crustaceous biscuitary salad and its vinous and alcoholic accidents, an acute expansion of the stomachic integument issues, which in the progress of its coexisting inflammation, affects the cerebral functions, excites the vaso-optic system, and gives a slope to the face. La, me, how strange!" said the old lady, "and what a wonderful thing it is to have turning
