Coming attraction - This is an artist's rendition of the proposed three-story Charles D. Tandy American Enterprise Center. If fund raising continues on schedule, construction will begin in the spring of 1986, with completion dates projected as early as the 1987 fall semester.

Construction set for spring term

Fund raising key to new building

By Pamela Utley Staff Writer

Vice Chancellor of University Relations and Development Paul Hartman has a clear view of Dan Rogers Hall from his Sadler Hall office window, but he hopes to see a different view by the 1987 fall semester.

If fund raising continues on schedule, construction of the three-story Charles D. Tandy American Enterprise Center will begin in the spring of 1986, Hartman said.

The new building will sit on the west side of Dan Rogers Hall. It will be joined to the hall by an atrium with

More than half of the funds needed to complete the new building and renovate the current business building have been raised, but Hartman said TCU's board of trustees will not allow construction to begin until the full \$8.2 million in committments is in

Hartman said all money for the building project will come from

donors, including an endowment to provide for operation and maintenance costs.

The American Enterprise Center is needed more to house new programs and the expanded business school curriculum than to give crowded classrooms more elbow room. Hartman

"We're not building it simply for space reasons," he said. "If it were purely for physical space we wouldn't be building this building." Each of the three floors of the cen-

ter will satisfy a need which the business school has no space for now, Hartman said.

The first floor of the building is devoted to business communications.

The business school dean and faculty are developing a "really innovative and effective program, teaching management communication skills,"

He said businesses complain that speaking and writing one-on-one and to groups is the biggest shortcoming

Bus driver chooses sensibility

DALLAS (AP)- A security guard who was disarmed and forced to drive a hijacked Greyhound bus more than 50 miles said he considered escape but decided it would be too risky on the busy highway.

Mark Showers, 30, of Irving, said the only things he could think of doing, such as swerving sharply, might have caused him to lose control of the bus and endanger other motor-

"A lot of things went through my mind; however, common sense prevailed," he said.

Showers, a security guard at the Greyhound bus terminal in downtown Dallas, was abducted at gunpoint shortly after 7 p.m. Saturday by an armed man who said he wanted to go to Oklahoma City.

After an 80-minute chase involving a Dallas police helicopter and more than 50 officers from five departments, the abductor surrendered just before the empty bus reached a roadblock near Valley View in Cooke

Joe Louis Ozuna, 30, of Dallas, was being held on \$100,000 bond in Lew Sterrett Justice Center on a charge of aggravated robbery.

Investigators Monday still had not determined a motive for the hijacking.

"A perfect description would be Dr. Jekyll and Mr. Hyde," Showers said of his abductor. "Part of the time he was a perfect passenger and the rest of the time he was yelling and screaming at me. . . . The last part of the trip all he would say to me was,

INSIDE

'Keep driving; don't stop.'

Today is election day at TCU. Students will cast their votes for an array of candidates to fill House of Student Representatives offices. Students will also have an indirect say about financial matters in the form of a referendum. For all of the above categories and issues, the Skiff makes its picks. Opinion,

WEATHER

Today's forecast calls for warmer emperatures under cloudy skies. The high is expected to be in the mid 70s and the low in the mid 50s. The wind will be out of the south at 10-20 mph. A 20-percent chance of thundershowers is predicted.

Capehart disqualified from House elections

By W. Robert Padgett Staff Writer

Presidential candidate Bruce Capehart was disqualified from the House of Student Representatives elections Monday night, interim chair of the Elections Committee Glenn Spears announced.

Capehart's elimination followed a three-hour meeting of the Elections Appeals Board, which heard arguments from Capehart and Spears about alleged campaign infractions by the candidate.

Capehart said immediately after the board's decision that he would appeal to the House of Student Representatives during today's 5 p.m.

"It will be discussed at (today's) House meeting," Capehart said. "If the House overrides the board's decision, I would be able to participate in

the election and the runoff." Spears, who chaired the Elections Appeals Board, filed charges against Capehart after a discrepancy in campaign spending had been brought to his attention. Spears charged that Capehart had spent more than the \$60 allowable for a House candidate.

The controversy centered around Capehart and the Students for Effective Leadership political action committee, which is headed by Blake

The committee, according to Woodard, was formed to urge, then elect, Capehart for president.

Both Woodard and Capehart, however, maintain the SEL committee is in no way connected with Cape-Yhart's campaign group.

Monday morning, Woodard distri-buted approximately 100 table tents in the Student Center cafeteria and in Eden's Greens. The tents expressed support for Capehart and cost Woodard an estimated \$20.

Capehart on Monday turned in his campaign spending records, which stated he had spent \$59.94, leaving him 4 cents shy of the limit. The \$20 Woodard spent on the table tents, the Elections Appeals Board said, put Capehart over the spending edge and therefore allowed him an unfair

advantage in the campaign.

According to the board's official statement, Capehart's name will remain on today's election ballot. He will not be able to serve if elected in the primary, nor will he be eligible for Thursday's run-off election if a candidate does not pull a majority today.

Capehart said after the board's decision was handed down that he had not influenced Woodard to produce, then distribute, the table tents.

"(The board) is trying to restrict me for something I had no control over, which was the activity of Blake Woodard," Capehart said.

Woodard and Capehart based their arguments on Section IV of the Student Rights and Responsibility section of the TCU calandar, which states, "Students shall be free to support or protest causes by orderly

The board, in its official statement, countered by saying, "The actions of the so-called 'Students for Effective Leadership' are considered campaigning as defined in Article 1.02 (of the TCU Election Code): 'A campaign is a sustained pattern of attempts to persuade voters. . . .

Dejection - TCU quarterback David Rascoe's expression epitomizes the Frogs' anguish after suc-

Whereas: That need includes all aspects of the proper operation of both the House of Student Representatives and Programming Council, and Whereas: The fee hike is supported by the House, as evidenced in a resolution passed earlier this semester, and Whereas: The fee hike is supported by the Programming Council, as evidenced by the speech given by the vice president for programming earlier this semester, therefore:

earlier this semester, therefore: Let it be resolved: That the student body fee be raised to \$20 per semester

per full-time (9 hours) student

Let it be further resolved: That this change be approved by a two-thirds
majority of the student body before becoming effective in the fall of 1986.

INS reports on Soviet sailor

WASHINGTON (AP)- The Im- officials found responsible for premigration and Naturalization Service has completed an internal probe into its handling of would-be Soviet defector Miroslav Medvid, and that report is being reviewed by the Justice Department, an administration official

said Monday.

The official, declining to be identified publicly, said the INS report was being studied by high-ranking officials at the department, including aides to Attorney General Edwin Meese and Deputy Attorney General D. Lowell Jense

Meese will likely review the report before any final action is taken, the

Meanwhile, Peter Roussel, a White House spokesman, declined to com-ment on a published report that the White House favors punishment for

maturely returning Medvid to his

The Washington Times quoted an unidentified senior administration official as saying: "It is in order that the investigation of this incident should lead to severe disciplinary action and a clear record of punish-

Roussel, noting that the grain freighter Marshal Koniev left port this past weekend with the 22-year-old sailor aboard, said only, "The executive branch has carried out its responsibilities in this matter.

The immigration service's internal investigation involved taking sworn statements from a contract interpre-ter, used to initially interview Medvid after he jumped from a Soviet grain freighter into the Mississippi River on

Oct. 24, and agents of the Border Patrol, which is part of the INS.

The ship was escorted from port by the Coast Guard Saturday after the administration, following a high-level review of legal options, concluded that it either could not or would not try to enforce a subpoena issued by a Senate committee, commanding Medvid's appearance before that

Agents of the Border Patrol twice returned Medvid to his 810-ton grain freighter in the early morning hours of

Irene Padoch, a New York interpreter who initally had interviewed Medvid by telephone in Ukrainian late on the night of Oct. 24, subsequently revealed she had told INS officials she concluded that Medvid wanted political asylum.

Computer flunkee 'bytes' more than he can eat

John **Paschal**

I just dropped my computer science

I had to. It was giving me a "ter-minal" illness, something called flunkus realbadus. The numbers just didn't add up. Well, yeah, they added up. Just not to the

right answers. That can get in the way of a good grade.

But the worst problem wasn't numbers at But the worst problem wasn't numbers at all, really. It was the language these computer people use. My brain printed out "Does Not Compute" nearly every time anyone said anything in my "computer sci" class, Pascal—a class I took only because it bore an uncanny resemblance to my name.

But it was the worst mistake since Custer

got cocky.

I got scalped. "Computer, sigh," would be a more fitting term for mushbrains like me.

These computer types have to be different. They can't be like the rest of us-stupid, uninformed, and happy to be that way. They want to expand horizons the average Joe hasn't seen yet. They want to make life simpler by making it more complicated. They're doing it, methodically, at this moment.

One day, while we're all sleeping-dreaming about things in normal English-they'll

pollute our minds with this evil computer language.

Then our lives would have some obvious

No one could ever say a word without first bracketing it, because a "comment" in Pascal will only compute if "curly brackets" are inserted on each side of the comment.

What if we wanted to comment on that "spurious bug" crawling about in yonder "binary tree." Our bracketed words would reflect thoughts of, by definition, a false bug-perhaps one of those rubber centipedes we sometimes purchase in novelty stores—on a tree of two parts—maybe the kind of tree that splits into

two distinct trunks at ground level.

But the computer dude would misinterpret our comments to mean a real error early in the

our comments to mean a real error early in the program in a recursively defined data structure whose "node" points the way to zero and which is capable of "sub-nodes."

A computer dude who mates with a computer chic and becomes a computer dad would call his little sub-nodes to dinner every night, because sub-nodes are also referred to as children. But if "node" has been translated. dren. But if a "node" has been too busy pointing to zero and hasn't had time for a family he

What if a computer dad gets tired of "interfacing" with his sub-nodes and wants to relax? Go home and take it easy computer dad. How about a massage?

"Oh, in the name of Wang, not that!" he would scream. For if he were to be "mas-

irrelevant clutter might be removed. Irrelevant clutter removal would eliminate a good chunk of a lot of dads' vocabs.

Being sympathetic, we could suggest that he go down to the local bar-called the "Draw-Bar" where computer dad lives—and enjoy a draw beer and a charburger.

But ol' computer dad would find himself in a heap of trouble if he did that. In the "Draw-

Bar, "computer dad wouldn't be taking in big-screen TV action or chalking the cue stick with computer chums. He'd be in a utility procedure that draws a line of characters with a "for" statement. And that tasty "char" burger? Not so tasty. He'd be biting into a character burger-any number of digit characters or punctuation marks between two lightly asted buns. If he wanted "root" beer rather than beer-beer to wash down his digit burger, he'd sip on a frosty mug of "topmost nodes." Go back home, computer dad, and have a

spaghetti" dinner.

If he took that advice, computer dad would

If computerdad isn't fond of tangled goto he might say, "These 'succ," meaning that tangled goto represents the successor to his argument-his argument being that he doesn't like tangled gotos. Kind of a vicious circle, this

But behold, if computer mother-in-law visited computer dad, a certain function of computerese would take on a delightfully new meaning. "Pred" and "succ" are relative ordering functions. Get the picture? Computer dad could order computer mother-in-law to whip up a "succ" ulent spaghetti dinner for him-if he wanted one.

Oh, look at computer dad. He's getting so frustrated by all this computerese that he's actually getting irate. He's clinching his fists! He's poking out his puny computer chest! It looks like he's going to try "brute force" again, my fellow "sub-node."

Well, there's no need to worry. "Brute force" means repeating an unsophisticated

solution step several times. But unsophosticated solution steps often include such atrocities as tying "sub-nodes" to a "binary tree" and flogging them unmercifully with a "ring

It's a real hassle. No good food, no good drink. Always eating "topmost nodes" and the like. And all those "spurious bugs."

But computerheads are cutting and drying everything for us normal folk, and soon every-

thing will be as exciting as beef jerky. You see, for must of us, that dried piece of meat is hard to chew. But not for the computerheads. They

just "byte" right through it.

Nothing is indigestible. From the simplest problem to the hardest, the computer swallows it and spits it back out in a neat, little

printed form. It's nauseating.

Non-computerheads are already being corrupted by this cosmic language, too. Computerheads are already being corrupted by this cosmic language, too. puterese has crept into our once-simple vernacular. We're constantly using words like "input" and "feedback," terms once exclusively reserved for computer output.

Output?! Uh-oh. It's happening.

HOT POTATO

Baylor's image of horned frog wrong

LETTERS TO THE EDITOR

At Baylor's Homecoming celebration two weeks ago, much ado was made about the matter of excellence in the quality of education offered by that school.

After viewing their Homecoming parade, one might have cause to question that thesis: there is a marked difference between a green frog and a horned toad.

Instead of horned frogs, the floats in the parade had a disturbing number of green frogs to represent Texas Christian University's

Newspaper doesn't serve students either

I really liked the title of your editorial-"Students Low on Priority List."

I thought, however, that you were finally going to talk about your reporting assignments and how students and their programs really are low on your list of priorities for print. (After all, how could we students get along without all of that day-old wire-service copy?)

As a senior, I have seen little more than lip service given to campus activities in the years I have been here, and always after the fact. One of the few articles written before a program this year was the article about Frog Fol-

certain other "student-run" organizations. When interviewed for this article, it was Mike Craig senior, economics

The Elections Appeals Board has unjustly eliminated from the contest for president of the House of Student Representatives the candidate most qualified for that

The board eliminated Bruce Capehart Monday night because of an alleged violation of the Elections Codecampaign over-spending.

Yet Capehart maintains he was unaware of the actions of Students for Effective Leadership, a group of students who purchased posters and table tents in an effort to promote Capehart. But the cost of the material was considered a contribution to the campaign, sending Capehart's campaign spending over the amount

It is ironic and wrong that Capehart be dismissed on such vague grounds after an incident last week in which he filed charges against two other candidates. Capehart had discovered the other candidates had more posters in many buildings than are allowed by the Elections Code. Capehart withdrew the charges after his opponents

corrected the situation.

But the consideration and kindness was not returned. No candidate should be disqualified under such vague circumstances. If Capehart did not know about the activities of the group whose actions stirred the controversy, then he should not be punished for them.

And if Capehart is disqualified, then so must be the two candidates against whom charges were initially

In addition, to take action against Capehart could

deprive the TCU community of the most experienced, most genuinely concerned candidate for an important

But the battle is not entirely over.

Capehart will appeal the decision before the House of Student Representatives Tuesday evening. If the House overrides the board's decision, and the students vote for Capehart as the person they want for the job, he would be allowed to accept.

Those students who support Capehart must not give up. They must cast their ballots as they would have before the board's decision.

And the House must override that board decision. In addition, students should vote against the referendum appearing on today's ballot.

The proposal would raise the Student Body Fee from \$15 to \$20 per semester. While it doesn't seem much, the money would be

used primarily to pay for social activities which, at this point, are not attended by a majority of the students. If the activities the House and the Programming

Council wish to sponsor are spectacular enough to draw crowd large enough to warrant the increase, then those students typically would be willing to pay to attend those events as they arise.

Perhaps if enough students attend the events in the coming year to prove the hike worthwhile, the proposal could be submitted next year.

Until then, the students should not have to face yet another increase in cost to attend this university.

of college graduates they hire.

We have developed a whole new program in management communications," Hartman said.

Baker said her job as hall director

"She's always been willing to take

on a project no matter how great it is

or how complicated it is," Higgins

The program should teach students how to make presentations, use charts and materials and speak to groups, as well as the use of what Hartman termed "the new mode of communication"-teleconferencing.

With teleconferencing, businesses can communicate through video via satellite, rather than send representatives across the nation.

Hartman said certain aspects of the proposed building will help teach stu-dents how to deal with teleconferencing. The center will have two electronic communications labs and one large management communications lab, where instructors can simulate a variety of communication environments. An audio-visual room allows students to tape themselves in a pre-

The only facility on the first floor

for the student managers of the Educational Investment Fund, who manage a \$1 million portfolio of assets.

The trade room will be equipped with quote machines, news wire services and areas devoted to trading. analysis and research.

"We've had for some time the Educational Investment Fund, but we've never had a special area designed completely for (the students') use, Hartman said.

The second floor is devoted to management information systems, or

The third floor will be dedicated to the American Enterprise Center.

This is a new program which Hartman said will be an outreach arm of the business school, staffed by faculty and some student assistants.

The center will develop programs, conduct applied research for businesses and industries and provide economic services for the campus and community.

Hartman said the school of busiwhich will house a carry-over prog- ness' expansion is growth in quality, ram from the other building is the not quantity. He said the university is trade room. It will be a work center as big now as it wants to get.

Special Work For Special People

Peace Corps volunteers are people pretty much like you. People with commitment and skills who have assessed their lives and decided they want to be of service to others in a troubled world.

The problems our volunteers deal with overseas aren't new. Such as the cycle of poverty that traps one generation after another because they're too busy holding on to get ahead. The debilitating effects of malnutrition, disease, and inadequate shelter. Education and skills that are lacking, and the means to

Your college training qualifies you to handle more of these problems than you might think. Such as teaching nutrition and health practices; designing and building bridges and irrigation systems; working on reforestation and fisheries protural techniques; advising small businesses and establishing cooperatives; or teaching math and science at the secondary level. The number of jobs to do is

nearly as great as the number of volunteers who have served since 1961: Nearly 90,000. More volunteers are being chosen now for two-year assignments beginning in the next 3-12 months in Africa, Asia, Latin America, and the Pacific.

Our representatives will be pleased to discuss the opportunities

The Toughest Job You'll **Ever Love**

For more information on meaningful, adventurous, careeroriented assignments at the community level to confront the hunger crisis in Africa, liliteracy in Latin America or lack of health care in Asia, call the Dallas Peace Corps Recruitment Office at 1-800-442-7294.

Move over Fridge, TCU has Icebox

By Grant McGinnis Staff Writer

LUBBOCK- Long before refrigerators were commonplace in American homes, the icebox was the standard means of keeping things cold. And long before the Chicago Bears' 308-pound William "Refrigerator" Perry became a pseudo folk hero, there was an icebox in Fort Worth.

Saturday, that icebox was the one thing that worked for TCU.

Mitchell "Herc" Benson came into the ballgame early in the second quarter with the Frogs already trailing Texas Tech 21-0. Ken Ozee had just kicked a 27-yard field goal but it was negated by a penalty on Texas Tech. That break gave the Frogs a first

With TCU on the Red Raider 5yard line, the 285-pound defensive tackle was summoned to carry the ball. It was his first collegiate play on

"It was just a regular dive play," Benson said. "They told me, 'If you can get it in the end zone, go for it."

And he did. Benson lined up on the right side of the ball behind the offen- of the best games of my season."

Flying high - Texas Tech split end Wayne Walker was flying Saturday, along with his Red Raider teammates. Walker carried the ball twice on reverses for 94 yards and caught six passes

sive line. The Frog giant took the handoff, was immediately hit, and spun off the tackler before rumbling into the endzone for the score.

'Of course, I was the first 'Icebox," he said, coining his new nickname. "I've had a little experience running the ball because that's what I played in high school."

"That's the one good thing that happened," head coach Jim Wacker said. Benson said it was hard to smile after a 63-7 loss. "But there's always some good points. I probably had one

raids record books words for Tolliver, who replaced sophomore quarterback Aaron Keesee in the second half of last

week's game against the Texas Lon-

Frosh quarterback

plays a dozen freshmen, finally faced a quarterback with less experience than they had. ghorns. Well, Tolliver, he's really enthusiastic," said freshman split end But the Frogs weren't exactly hap-py that freshman Billy Joe Tolliver, who set a Southwest Conference re-Wayne Walker, who carried the ball twice on reverses for 94 yards. "And Keesee, he's the scared and nervous cord for passing yardage in a game, was calling the signals for Texas Tech type. Tolliver's got a better arm. He just fires the whole team up."

If Tolliver is so much better than Tolliver completed 26 of 43 passes Keesee, why did Moore wait until the for 422 yards, 5 touchdowns and no ninth game of the season to start him? interceptions in three quarters. All

"Tolliver wasn't like he was today when we started the season," Moore said. "He had a bruised shoulder. If first six possessions in mounting a 35-7 lead by halftime. he could have played that well in the very first ball game, obviously we would have played him."
The Raiders weren't buying TCU's

To say Tolliver's performance was unexpected would be a huge understatement. "One of the biggest plusweekly inexperience excuse. All three ses I thought he'd give us was a little spark and leadership," said head coach Jerry Moore. "But I don't think you ever predict that a player will go out and have a phenomenal day like split ends-Walker, Tyrone Thurmon and Eddy Anderson-are freshmen. Tight end Ricky Boysaw is a sopho-

"I wouldn't think that they're any more inexperienced than we are," Moore said. "Their quarterback has a lot more experience than Tolliver

For Tolliver, the game was a record experience. "I know something will come along and break them, but what is really great is that everybody helped me get it," he said.

Even though Tolliver might believe that some inanimate object will some day break his record, it will take awhile before any Tech quarterback has a chance. With three seasons and two games left for Tolliver to start in his collegiate career, Tech appears set at the quarterback position.

In their previous eight games, the "We've got other good quarter-Red Raiders were primarily a rushing backs, but he's certainly our quarterback right now," Moore said. When Tech passed the ball, it used a

Happy VI, Tech's mascot horse, galloped on the sidelines everytime the Raiders scored. Happy had quite a workout. Rumor has it that Sunday's mystery meat in the school cafeteria was unusually tough.
