# Unidentified male found in women's locker room

#### **By SKIFF STAFF**

A female student reported an unknown male in the women's swim team locker room Sunday evening.

The student was attempting to change when she saw a man poke his head out from one of the women's bathroom stalls.

The student told TCU Police the man apologized as she fled the locker room.

She described the suspect as a 20-year-old, short, Hispanic male with a mustache, wearing black shorts and a white T-shirt.

TCU Police Sgt. Keily Ham declined to comment on whether the suspect was a TCU student.

This is an ongoing investigation, Ham said.

### Local high schools join together for scientific Saturday

#### By MICHAEL BEST Staff Reporter

No torches were lit during Saturday's Physics Olympics, but eggs were smashed to bits.

The TCU Society of Physics Students hosted its third Physics Olympics in the Sid Richardson Building on Saturday.

Students from five area high schools formed nine four-person teams to compete in five events. Mark Dunleavy, the Webmaster for SPS, said the winner was the team with the highest score when the grades from the five events were totaled. SPS organized all of the

day's events without the instruction of a professor, Dunleavy said, and was different from years past when professors were directly involved in the process.

Each event was weighted the same, and a 30-minute

time limit was allotted for each lab, said Sarah Duesman, a sophomore SPS member.

Olympic events included a bull's eye test in which students calculated the trajectory of a steel ball shot from a spring-loaded launcher. Students attempted to aim the launcher to hit the center of a target for a perfect score.

Students fashioned eggprotection devices using plastic plates, straws, toothpicks, plastic grocery bags See **PHYSICS**, page 2

Ham said there are many video surveillance cameras in the University Recreation Center, and TCU Police are working to get more information.

Although police are unsure of how the suspect entered the locker room, one possibility is the suspect broke into the officials' locker room, located in the basement of the Rec Center, climbed up through the ceiling tiles and fell into the women's swim team locker room next door, said Steve Kintigh, director of campus recreation.

Ham said this possibility has not been proved nor disproved.

Until the investigation is complete, the Rec Center staff cannot make any judgments about the current security system, said Jay Iorizzo, assistant director of facility operations.

wide. The closing line asked how it is possible to make the plights of others who are miles away seem real. They hit the nail on the head. Human beings have a duty to take care of each other. But the reality is it's too easy to get caught up in everyday life here at TCU to the point that the problems of the world seem distant and surreal.

The small, sparse student activism groups on campus have been working hard - mostly unnoticed - to change that. It's time they received some credit from the student body and help with their cause. It's in TCU's mission statement, after all, "to think and act as ethical leaders and responsible citizens."

It's well-known that grades and partying tend to take priority over most other issues during these four years - and why shouldn't they? After all, it is college. But some students, in the midst of their beer

and textbooks, are attempting to bring social injustices to light by leading organizations such as Frogs for Fair Trade, Hunger Week and The One Campaign.

These groups aren't asking for much. No one is demanding you put your education on hold to join the Peace Corps and move to Bali for three years. Campaigns such as The One Campaign say just awareness of issues can help create change. One by one we can fight AIDS and poverty, The One Campaign, a Facebook group, says of its cause. And Frogs for Fair Trade has provided an easy, thoughtless way to make a difference. Instead of purchasing coffee that takes advantage of South American farmers, purchase the already-offered fair trade-certified coffee that promises to treat these farmers as human beings and pay them living wages.

The point of these student-led activist groups is not to demand all of our time and money but, instead, to ask for small changes that when added up make a world of difference.

Features editor Amber Parcher for the editorial board.

**OOOFSPOOF BY ROLF NELSON** 

# Humans should make efforts to control global warming

Last week, 18 months after Hurricane Katrina, New Orleans and its surrounding areas were hit by a tornado. In an

ters, asks "How do you

start over again when you are already trying to do that?"

How are some people so unfortunate that their homes are hit by deadly and devastating natural disasters twice in a two-year span, let alone once in a lifetime? Is it really all up to chance, fate and perhaps karma?

With a scientific approach, many climate and weather experts want to attribute the recent increase in the quantity and intensity of natural disasters to the effects of global warming. Fortunately, the government is starting to pay closer attention to the implications of the greenhouse

effect and how our pollution affects the environment. The U.N.'s Intergovernmental Panel on Climate Change released an assessment this month that, for the first time, attributes the earth's rising temperatures to human activity.

I don't understand how people ever doubted humans were creating such profound changes in the environment. With all the industrial factories and the number of cars emitting fumes everyday, it's no wonder that, right here in the Metroplex, there is visible smog when you drive on highway overpasses.

Maybe we just feel like storms are getting the better of us because there is so much more at stake; we are a more vulnerable society with the rising population and constant development. Maybe global warming is a government conspiracy, blinding citizens to the truth that their own inhabitancy of the earth is destroying it. Okay, this is a bit of an exaggeration; so, it's not a government conspiracy.

On the frozen Beaufort Sea outside the Inupiat village of Kaktovik, Alaska, a polar bear takes a break from gnawing on whale meat. The 3,800 polar bears along the Alaskan coast face an uncertain future as global warming melts more summer sea ice earch year.

But, our growing population is undoubtedly contributing to these effects. For a simple analogy for all the waste and pollution people contribute: When you dust, it never goes away; it just gets moved from place to place. I wonder how we are able to make such strides

and advancements in technology that we can make a robot cry for a Super Bowl commercial, but we can't come up with a better way to control our pollution. And even if these developments arise in future years, that only takes care of the current inhabitants of

Earth. According to a Feb. 16 Star-Telegram article, the world is gaining 75 million people each year. So what about the new arrivals we're expecting next year?

ing population. Better family-planning would have beneficial effects in America alone, serving to reduce teenpregnancy and abortion rates.

3

It's worrisome to think the government could dictate the number of children we have, but I bring this up to state that this kind of despotism is not at all what I'm advocating. Childbirth should not be a government policy. But, according to the Star-Telegram article, "The United States and other nations should put much more emphasis on reining in global population growth."

Expanding the wealth of our society is not a negative thing as long as we are prepared to take care of the damages to the environment it may create, as well as educating others to do the same. We shouldn't be afraid to have a little selfcontrol for the benefit of our international neighbors, and more importantly, for the well-being of our posterity.

It is time the world's population open its eyes and take notice that we ought to make efforts to control the grow-

Anahita Kalianivala is a freshman English and psychology major from Fort Worth. Her column appears Tuesdays.

# Venezuela should embrace free speech New TV converter boxes

Venezuelan President Hugo Chavez traded free speech for controlled speech at America's expense when he chose not to renew the license of RCTV, one of Venezuela's oldest and most popular news organizations, for criticizing his rise to power.

Since Chavez began ruling by decree Feb. 1, 2007, he has cut off many ties with the U.S. while making deals with oil-rich nations in an effort to weaken America and enforce what he calls "socialism of the 21st century."

"No media outlet will be tolerated here that is at the service of coup-ism, against the people, against the nation, against national independence, against the dignity of the republic," Chavez said to the media in a televised speech. "Go and turn off the equipment."

As the self-proclaimed leader of the Bolivarian Revolution, Chavez has vowed to liberate his country from the threats of imperialism. His economic agenda, combined with his anti-American attitude, has given him worldwide attention and support from nations such as Saudi Arabia, Cuba, Russia, China, Iran, Iraq and Sudan.

It's important to realize Chavez craves this power and will abuse

it to get more. "The dignity of the nation" is becoming the dignity of one man, which is completely dependent on the absence of free speech and perhaps the free speech in our own country.

Instead of using free speech in Venezuela to assess approval of his leadership and anti-Americanism, Chavez uses free speech in America as a promotion. For example, he claimed that particular threats made by the Rev. Pat Robertson were a direct military threat from the American government, which he told ABC's Ted Koppel in 2005.

Now that Chavez controls the media, he is able to blur the line between free speech and government speech in his nation, making it appear blurry in America as well.

This is downright dirty business that brings no advantage. It fuels hatred for America, which is one of the only things Chavez has in common with his allies. Additional similarities include vast amounts of oil, total government control, excessive militarization and social dependency on the head of state.

If Chavez controls the Venezuelan media, he controls the thoughts of everyone watching by only providing bits and pieces of the many things people say in the free world and pretending

like their words come directly from President Bush.

When RCTV criticized his rise to power, Chavez responded harshly by taking their right to criticize away and blamed the incident on American influence. He holds Venezuelans' freedoms hostage and gains a tighter grip on society with American criticisms.

"The left is back and it's the only path we have to get out of the spot to which the right has sunken us," Chavez said. "Socialism builds; capitalism destroys."

If Chavez, along with a handful of individuals around the world, have the power to control the media, they too have the power to control citizens and together as allies, who knows what else?

They can force millions into adopting the goals of the handful and together deceive all their people into fighting against America.

This is too much power and should not be taken lightly. Looking beyond our borders and around the globe, there are different extremes in the way freedom is taken away and the ways in which eyes and ears become shut. We should recognize the threats of socialism taking form around us at every level and protect free speech at all costs.

> Ashleigh Whaley is a junior newseditorial journalism major from Austin.

# not fair to poorer classes

In two years, by statute, broadcast television as we've always known it will go away. On Feb. 19, 2009, all analog broadcast signals will be replaced by digital signals. The picture will be sharper and clearer ---no more of the old-fashioned snow or ghosts on the screen.

Of course, even if the switchover occurred tomorrow, most of us wouldn't notice it. Only about 15 percent of American households still hook up an antenna to watch TV. Everyone else has cable or satellite service, which will still work just fine after the digital switchover.

Anyone who wants to keep watching TV the old-fashioned way will need to buy a new set or plug in a converter box. And here's where Congress comes in. In 2005 lawmakers agreed to pay at least \$990 million to subsidize the cost of converter boxes. They would even spend \$1.5 billion. That would be the same as every household kicking in \$13 in taxes to help a handful buy converter boxes.

This is absurd. In fact, this is nothing more than a corporate welfare program. It's the broadcasters and equipment-makers who'll really benefit from the handout.

Still, the Commerce Department has dutifully drafted a plan to help cablefree viewers upgrade. Each eligible

household will be able to collect as many as two \$40 coupons toward the purchase of converter boxes, which are expected to cost \$50 to \$75. The converter coupons alone could cost taxpayers as much as \$1.36 billion.

Last fall Rep. John Dingell, D-Mich., now the chairman of the House Commerce Committee, sent the Bush administration a letter co-signed by 19 other lawmakers. It complained that the proposed converter-box policy "disadvantages the poor, the elderly, minority groups and those with multiple television sets in their home." Dingell and the others insist the present plan would "unfairly disenfranchise consumers with perfectly good televisions," who ought to have access to a "government-backed plan to hold them harmless."

That's right. There's a new "victim" group in town: the unfortunates who struggle with the burden of "multiple television sets." There's no "right" to watch television, and it's not up to the government to make sure people can.

The bottom line is that it makes no sense to use taxpayer money to help TV viewers upgrade their receivers. It's time to pull the plug on this foolish subsidy.

The agreement says a new Palestinian coalition government will respect" previous agreements signed by the U.S. Secretary of State Condoleezza Rice, center, shakes hands with Israeli Prime Minister Ehud Olmert, Palestine Lib-

eration Organiright, and Palestinian Authority President Mahmoud Abbas, before a meeting at a hotel in Jerusalem zation, accords

The talks, the first joint that include recognition of Israel and a renunciation of violence.

Rice said Abbas and Olmert had discussed "issues arising from the formation of a Palestinian national unity government," and the conditions that have been set by the Quartet of Middle East mediators - the United States, the European Union, the United Nations and

Russia. "All three of us affirmed our commitment to a two-state solution, agreed that a Palestinian state cannot be born of violence and terror, and reiterated our acceptance of previous agreements and obligations, including the roadmap," Rice said, referring to the dormant U.S.backed peace plan that outlines steps to resume talks leading to a Palestinian state.

Rice said Abbas and Olmert agreed to meet again soon, and ians. repeated their desire for American participation. "In that vein, I expect to return to the region soon," she said.

State Department spokesman Sean McCormack said no date had been set for another threeway meeting.

said he had insisted in Monday's government meet the conditions set by the Quartet, halt rocket fire from the Gaza Strip and free an Israeli soldier held there since he was seized in a date that suggests that this is a cross-border raid by militants in June.

"I added that we will not recognize any government that will not honor these commitments, and we will not cooperate with it or with any of its ministers," Olmert said.

However "we will maintain said, referring to Abbas by his nickname. "It was agreed that contacts between us would con-

al of some roadblocks in the ority for us." West Bank, announced after a

judgment on the new Pales- Palestinian coalition.

Speaking later to legislators tinian government until it is from his Kadima party, Olmert formed, but she indicated that the guidelines set in the powtalks that the new Palestinian er-sharing accord, reached this month in Mecca, Saudi Arabia, did not meet international demands.

> "I haven't seen anything to government that's going to meet the Quartet's principles, but you know ... we will see once the government is formed," Rice told reporters.

Abbas told U.S. officials the agreement was the best he could get to halt months of fighting between Fatah and Hamas that the channel of communica- left scores dead and brought tion with Abu Mazen," Olmert Palestinians to the brink of civil war.

#### By HAL BERNTON The Seattle Times

TIMBERLINE LODGE, Ore. - Three missing climbers stranded overnight in a storm-whipped canyon were reached Monday morning by a rescue party that had set out before daybreak from this Mount Hood ski resort.

The rescuers had known the general location of the climbers but efforts to zero in on them were hampered by poor visibility due to heavy snows.

The climbers include a woman who suffered head injuries Sunday as the trio fell into the canyon during a snowstorm.

She is conscious and alert but has short-term memory loss," Rocky Henderson of the Portland Mountain Rescue said Monday morning.

The missing climbers had spent the for evacuation. night in an area of the White River Can-

made contact with searchers at the lodge throughout the night and morning.

In a conversation at about 7:40 a.m. PST, the group appeared to be cold but lucid and eager to be rescued, according to Clackamas County search officials.

Mountain locator units that the trio had carried with them had helped to narrow the search area to a portion of the canvon at the 7,100-to-7,500 elevation level. But it had not yielded a precise location. Unconfirmed reports were that the climbers were found somewhere around 11 or 11:15 a.m.

Monday morning, the snow was not as intense as Sunday evening. Volunteers tain Sunday. had hoped to find the climbers with plenty of daylight left so there would be time

the canyon.

A second group of six searchers departed Sunday evening from farther east near Highway 35 to try to work their way to the climbers. That group made it above the 6,000-foot elevation level then pitched a tent due to hazardous conditions. They had planned to resume the search Monday morning, Henderson said.

The missing climbers were part of an eight-person group that ascended part way up the mountain Saturday in planned two-day outing. Due to bad weather, they opted not to reach the summit Saturday and headed down the moun-

The outing went awry as the weather socked in and visibility faded. The threeperson climbing group fell off a steep Timberline Lodge has served as the ridge and tumbled down into a canyon. After the fall, the climbers were unable the canyon for about 40 minutes. The other group of five dug a snow who Monday morning headed east from cave and was rescued by searchers late

"My grandson of George Banner- dad always felt a duty, a responsibility, to serve the company in News at the behest of Col. A.H. the legacy of G.B. Dealey. His Dealey. James McQueen Moroney sense of dedication and loyalty He served a record 48 years to the company is what really and was chairman of the board on Belo's board of directors, distinguishes his relationship to

"He loved the newspaper business, and he loved the TV busiagement job at the company over ness - he really did," Moroney III said. "And he liked people."

Frank A. Bennack Jr., vice steady leadership and constant con- chairman and former chief executive officer of Hearst Corp., said Moroney was among the first to "He will be remembered understand that media companies always for his personal humility needed to launch new products and expand into new markets.

Moroney "was instrumental in Belo's expansion in both directions," he said.

William Burleigh, Scripps' steady and powerful influence chairman, recalled Moroney's of Utah Beach. focus on the need for newspapers and television stations to serve the public.

Moroney's son, James M. excellence," Burleigh said. "He rior, he saw a great responsibility. He always struck me as loyal to his city, church, friends, family and work."

of Belo Corp. and president and CEO of Belo Broadcasting Corp. Four years later, he was named chairman of Belo Broadcasting.

In the 1970s, Moroney played a pivotal role in transforming The News from a privately held business to part of a publicly held media corporation, a transition the company made in 1981.

His support of the direction set by the company's independent board members, along became a Belo executive in 1934 with his collaboration with Decherd, contributed to Belo's rapid expansion.

In 1980, he was elected president and CEO of The News and president and chief operating officer of Belo.

He and Decherd fundamentally transformed The News then under intense competitive pressure from the Dallas Times Herald - by hiring Burl Osborne as the paper's new editor.

In January 1983, Moroney became CEO of Belo, while retaining the title of president. In April 1984, he also was elected chairman of the board.

While he was the company's CEO, Belo purchased Corinthian Broadcasting Group from The Dun & Bradstreet. The 1983 transaction for \$606 million was the largest in U.S. broadcast history at the time.

Moroney retired from Belo on Dec. 31, 1986 - at age 65 - but remained on the company's board of directors, where he was chairman of the executive committee. He retired as a Belo director in

The track and field team prepares for the Mountain West Conference Indoor Championships. TOMORROW

## How sweep it is; team wins 3 straight

JASON FOCHTMAN / Staff Photographer

TCU pitcher Chris Johnson starts the second game against Oral Roberts on Sunday afternoon. The No. 16 Frogs swept their three-game weekend series versus the Golden Eagles and will play four games in South Carolina this upcoming weekend.

#### By MARCUS MURPHREE Sports Editor

Three different games. Three different scores. But all three games against the Oral Roberts Golden Eagles were Horned Frogs victories.

The baseball team (6-1) completed a three-game sweep of Oral Roberts (2-3) after some clutch hitting by junior shortstop Bryan Kervin and senior outfielder Austin Adams.

During the series, Kervin went seven for 12 with a home run and five runs scored, while Adams had six hits and five runs batted in.

"They are too good of players to hold sub-.250 batting averages," head coach Jim Schlossnagle said. "They show up when the game is on the line, and that is a sign of a veteran player."

In game two of the series Saturday afternoon, Adams and Kervin came through to help bring the Horned Frogs back from a three-run deficit. Kervin hit a two-out, go-ahead home run in the bottom of the eighth inning, and Adams put the nail in the coffin with a majestic three-run homer three batters later.

The streak for the two continued after Saturday's slugfest as the tandem kept plugging away against Golden Eagle pitching when the two combined for five hits, three runs and two RBI.

Oral Roberts brought a touted lineup into the series that was silenced by TCU's pitching staff. The No. 3 and No. 4 hitters in their lineup, junior catcher Brian Van Kirk, and senior first baseman Chad Rothford each put up subpar numbers in the three-game set. The two combined to go 2 for 22

and could not solve the collective starting performances from pitchers Jake Arrieta, Chance Corgan and Chris Johnson.

"We just wanted to get ahead of them on the first pitch then jam them with fastballs and change-ups away," junior catcher Andrew Walker said.

By keeping Van Kirk quiet at the plate, the Horned Frogs were able to keep the bases relatively empty in front of Rothford.

When the two did get their only hits of the series, it was backto-back solo home runs off redshirt freshman Derek VerHagen.

"In those situations, you just keep throwing strikes, and he did a good job," Schlossnagle said.

The series marked the first sweep of the season and the first at home since the Horned Frogs took three straight from UT-Pan America last May.

"We've sometimes has trouble getting the sweeps, like last week (against UCF)," Walker said. "But this is against a top-30 team, and we played a lot of good baseball this weekend."

The team will prepare for their four game road trip in South Carolina this week where it will face three NCAA tournament teams from 2006.

"We are fortunate to have won three games against a great club," Schlossnagle said. "I'm really proud of our team and this should springboard us into next week."

# Frogs' 19 home-game wins set new university record

#### By ALEX ZOBEL Staff Reporter

After a decisive victory against the Utah Utes on Sunday afternoon, the Lady Frogs have now set a new school record as they have won 19 consecutive home games.

Led by junior guard Adrianne Ross' game-high 22 points and six steals and junior guard Helen Roden's tenacious defense, the Lady Frogs cruised to a 74-50 victory, redeeming their 72-61 loss on Jan. 18 in Utah. The Lady Frogs have scored more than 70 points in the last three home wins.

The Lady Frogs took command of the game from the outset and led 17-1 after only six minutes of play. Beginning with a much

needed 3-pointer by Utah's go-to player, guard Morgan Warburton, shots began to fall for the Utes, and the lead was cut to seven with 3:23 to play in the first half.

The Utes, however, wouldn't get any closer as the Lady Frogs reclaimed control of the game in the second half.

TCU (19-7, 9-3 conference), previously in a three-way tie for second place in the Mountain West Conference, is now the only team in second with New Mexico (19-7 overall, 9-4 conference) and Utah (16-10,

9-4) falling into third. TCU dominated the game on the defensive end, holding the Utes 12 points under their season average and smothering the team's star player.

Warburton's ability to drive

the ball was stifled by Roden, the Utah guard, who has averaged 20.3 points her last six outings, was held to 13 points and one assist.

"We focused on (Warburton) a lot," senior forward Ashley Davis said.

A pregame goal for the Lady Frogs was to play with more intensity on the defensive side of the ball, TCU guard Danielle Nunn said.

"There have been a lot of defensive drills in the past four days of practice," Nunn said. "We've been doing one where we play defense while holding a tennis ball in each hand."

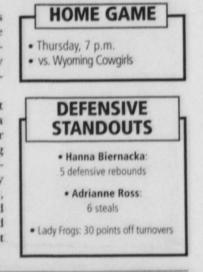

The relentless Wyoming showing on the defensive side of the ball led to 26 Utah turnovers compared to TCU's 12, one of the largest turnover margins this season. The play led to 30 points off of turnovers for the Lady Frogs.

While the 24-point rout of the Utes seems like a sub-par performance for the Lady Frogs, considering all six of the home conference victories have been by an average of 31.2 points, head coach Jeff Mittie said he thought the team played well against one of the best teams in the conference.
