THE SKIFF VIEW

Tuition increases not essential

uition has increased across the board yet again.

Both public and private four-year universities report a tuition increase higher than last year's.

According to a College Board survey released Monday, public and private fouryear university tuitions have risen 6.6 percent and 6.3 percent, respectively. Both of these increases are higher than those of the previous year.

College Board reported a 5.3 percent increase in room and board at public fouryear universities and a 5 percent increase at private four-year universities.

With increasing dining plan costs — like TCU's newest proposal — and higher costs for on-campus living, it's virtually impossible to get through college without mounds of debt.

Are all these increases really necessary? It's hard to fathom that college operating costs have risen so dramatically over the past decade.

Although federal aid has increased as well, it is still not keeping up with the exponentially changing tuitions and college expenses.

According to the College Board survey, federal Stafford loans, which accounted for more than half of student aid a decade ago, were only a third of student aid last year.

Universities throughout the nation are making it increasingly more difficult to obtain an education, and for people to become productive members of society.

The government just isn't keeping up. A college education is now a requirement for even the most basic of jobs. Increasing tuition without increased federal aid only makes it harder for people to contribute to the economy and succeed financially.

In order to allow all citizens an equal opportunity to attend college, tuition increases need to be kept to a minimum or the government needs to catch up in its student aid programs.

Competitive eating hardly an athletic event

Every Fourth of July, before the food is grilled and uncle Kevin almost blows your brother to Hades with an industri-

al-sized box of fireworks, ESPN airs its' coverage of the Nathan's Famous Fourth of July International Hot Dog Eating Contest.

Every year they spew the same propaganda. It's all about how competitive eating is one of the fastest growing sports in America, surpassing pedestrian efforts such as lawn mower racing and professional ice hockey in attendance and advertising rev-

Competitive eating is not a sport. It's not even athletic. I'm impressed that some chemical plant worker from Scranton his machine-like efficiency. can down an insane amount of Snickers bars in twelve min-tive eaters are passed off as utes, but why should ESPN put that achievement in an information graphic featuring Wilt Chamberlain's 100point performance and Peyton Manning's single season touchdown record?

That's an insult to real athletes everywhere.

Still, Major League Eating insists their organization "combines the appeal of traditional

sports with the most extreme of all extreme sports."

Anything I can do from the comfort of my own home shouldn't be considered a

I have fat friends that sit around all day and drink untold amounts of Mountain Dew and suck on Pixie Stixs. Do I tell them to go challenge Joey Chestnut and Sonya Thomas in the glamorous world of public overeating?

I tell them to hit the treadmill like Marion Jones (minus the steroids) so they can live to

The poster child of competitive eating is Takeru Kobayashi, the Japanese sensation who won the Fourth of July hotdog eating contest every year from 2001 to 2006, trouncing the competition with He's also the reason competi-

ESPN always mentions Kobayashi's bulging biceps and religious gym habits, likening this to professional training regimens. You know, because Kobayashi really needs massive forearms and strong quadriceps to shove all sorts of saturated fat and grease down his

Competitive eating isn't even

good for you. Football, baseball, basketball, tennis, etc., all have a positive effect on physical well-being if participants don't impale themselves on chain-link fences.

Competitive eating can screw you up. According to Dr. David Metz in an article published on WebMD, stomach paralysis, or gastroparesis, can result when a stomach is constantly stretched beyond its normal limits. The muscles eventually fail to contract, and the stomach will lose the ability to empty itself. It can cause chronic indigestion, nausea and vomiting.

As of now, there is no effec-

Still think that's a sport? Well, then let's all run down to the Shell station and smoke five consecutive cartons of Marlboros.

Nothing says sports like destroying your alveoli and being the first college student on your block to die of emphysema. Hooray for the athletes of Major League Smoking!

Moving your mandible while pushing your body to the point of irreparable harm isn't athletic. It's harmful consumption for the sake of spectators.

Gluttony is a sin, not a sport. David Hall is a sophomore newseditorial journalism major from Kingwood.

His column appears Wednesdays.

Iran issue a reminder of Iraq, the importance of intel-gathering

President Bush is not known for choosing words carefully, so perhaps critics should set aside his recent reference to Iran and World **EDITORIAL**

At an Oct. Philadelphia Inquirer 17 news conference, Bush remarked that "if you're interested in avoiding World War III, it seems like you ought to be interested in preventing them from having the knowledge necessary to make a nuclear weapon." To dwell on that cavalier comment - made after Russian President

Vladimir Putin met with Iranian counterpart Mahmoud Ahmadinejad — diverts attention from more urgent questions.

Some in the Bush administration are indeed pounding the drum louder for military action to curb Iran's nuclear development pro-

If the rhythm is familiar, it's the same one Americans heard during the run-up to the 2003 Iraq invasion.

Now, like then, few are weighing the consequences seriously enough. But we know something now we did not in 2003: the cautionary tale of the Iraq invasion. Think of intelligence.

As the world now knows, the U.S. lacked good intel for Iraq's weapons program, in part because of insufficient human intelligence.

The same is true in Iran, where there is no U.S. embassy, decision-making by the nation's religious leadership is opaque, the terrain is more rugged than Iraq's and the population much bigger. Nor do U.S. intel-gatherers

have much grasp of Iranian culture or politics. Washington clearly misread Iranian politics in 2005, when Ahmadinejad trounced the American-favored Ali Akbar Hashemi Rafsanjani, the reformist former president, at the polls.

An Iran offensive is more likely to consist of air strikes at suspected nuclear facilities study these possibilities, than a full-blown invasion.

What is the state of U.S. knowledge about those facilities? Suppose an air assault is not enough. What next? A military offensive would probably alienate the Arab street in Mideast countries friendly to us (if not the governments) and shatter any chance of diplomacy.

Here's a scenario based on the aftermath of Iraq: An Iran attack will further inflame anti-

Americanism

and be another recruiting boon for Osama bin Laden. The U.S. military stretched thin because of Iraq — will be unprepared for the retribution that could follow.

Iran could call on its junior partners, Hezbollah and Hamas, to target Israel or American interests.

Ahmadinejad and the ayatollahs could use a U.S. assault to justify more meddling in neighboring Iraq.

This is the moment to the moment to remember that the threat Iran poses doesn't yet require an attack. Besides, as Iraq has shown, a military response does not guarantee the threat will go away.

> This editorial appeared in the Philadelphia Inquirer on Monday and was distributed by McClatchy-Tribune Information Services.

Sports fans should not judge athletes based on steroid use

The NBA is dealing with the Tim Donaghy gambling scandal, and the NFL is being dogged by Michael Vick. What is Major League Baseball dealing with? It's

still steroids. COMMENTARY Baseball play-

ers may seem larger than life on the field, but they're still just people off of it. We shouldn't be so quick to attack them whenever controversy arises.

I'm sure every Texas Rangers fan remembers former slugger Rafael Palmeiro wagging his finger at Congress while stating, under oath, that he had never done steroids.

Palmeiro was suspended five months later for violating the league's substance abuse policy. President Bush even discussed

the issue in his 2004 State of the Union Address. "The use of performance-en-

hancing drugs like steroids in baseball, football and other sports is dangerous and it sends the wrong message," he said. That message being there are shortcuts to accomplishment, and performance is more important than

Steroids are bad for your body, but so is alcohol abuse. It's not so much the steroids that have a

CHUCK KENNEDY via MCT Barry Bonds has been shrouded by steroid controversy since 2003 when the initial BALCO investigations were in the public eye.

negative effect; it's the constant use and abuse of them that breaks down your body, much like alcohol affects your liver. If you don't want to drink alcohol then you don't have to; it's a matter of personal choice. You aren't required to use steroids to play baseball.

So if athletes decide to put strange substances into their body to enhance their performance, isn't that their own business? Should

we outlaw Viagra too? If we had been willing to realize that this issue isn't worth all the trouble, then we might have been able to enjoy watching Barry Bonds break the all-time home run

Instead, we watched as one of the most hallowed records in professional sports fell in a shroud of controversy.

record this summer.

Sure he may have gained some weight since the 1999 season, and his home run totals have spiked a little bit. What everyone seems to forget here is that Bonds won

three MVP awards in the early 1990s, and didn't become a great player overnight. He was a skinny kid in his early years, so could it be that he just put on some weight with age?

His home run totals from 2000-2004 average out to about 46 per season, excluding the record breaking 73 bombs he hit in 2001.

That's a staggering total, but not a huge jump considering he averaged 36 per season during the 1990s.

His walk totals have always been moderately higher than his strikeout totals as well since his first MVP in 1990, which usually signifies a keen batting eye at the

Another thing people forget is this is the same Barry Bonds that we watched break the single season home run record in 2001. America needed something to cheer for in the wake up Sept. 11, and there he was swinging away at

If the players are hypocrites for using steroids to enhance their performance, what does that make the fans egging them on and demanding perfection from them?

Last time I checked, Bonds still hadn't been found guilty of using steroids.

Roger Clemens has managed to escape the steroid controversy even though his production spiked in his 40s, so why does everybody point to Bonds?

There have been issues in baseball as far back as 1919, when eight members of the Chicago White Sox were banned for intentionally throwing games in the World Series in what came to be known as the "Black Sox" scandal. The incident served as inspiration for Kevin Costner's movie "Field of Dreams" in 1989.

When Ty Cobb played in the early 20th century, he was known to sharpen the spikes on his cleats in front of opposing teams, so there would be an intimidation factor whenever he slid in to a base feet first. How long would he have lasted in today's game where umpires have the right to eject players at the first sign of bad blood between

The Hall of Fame is a place to celebrate players who made notable achievements in baseball, not for notable achievements in humanity.

Ditto for Major League Baseball's new home run king, Barry Bonds.

TAKING AIM

Sophomore Lauren Sullivan shoots at a competition last spring. Coming off a secondplace finish at the Ole Miss Invitational, the rifle team will host Alaska today.

Team tries to climb rank ladder in Texas

By MICHELLE NICOUD Staff Reporter

The volleyball team will try to maintain a near-perfect record against Texas opponents tonight.

When the Baylor Bears visit the University Rec Center tonight, TCU will attempt to earn its fourth victory in five matches this season against in-state opponents.

Sophomore outside hitter Lauren Otto said she and her teammates have been looking forward to the matchup.

"We want to be the best team in Texas," Otto said. "(We want to) be able to beat everyone else out so we can pull up the rank in Texas."

Otto has been out with ankle and hand injuries. She said this will be her second match back.

"I felt pretty good and kind of got back into the swing of things," Otto said. "Yesterday and today at we play a lot of 6-foot-5-inch practice, I've been working back into it."

Senior libero Calli Corley said the squad relishes the opportunity to play against a team with as rich a volley-

ball history as Baylor. "It's a really exciting thing to get to do just because they are a really good team," Corley said. "History wise. they've been in the NCAA tournament a couple times, home court.

and they've been at the top of the nation a couple times."

Corley said Baylor also gives the team a chance to play another Big 12 squad. Baylor is the second Big 12 opponent of the season for the Horned Frogs — the first was a 3-2 loss on Oct. 3 to Oklahoma.

The Horned Frogs played Baylor last spring, but head coach Prentice Lewis said what happened last spring has not played a role in how the team has gone about preparing for tonight's match. The team has seen video of the Bears, but has little information otherwise about what to expect, Lewis said.

Sophomore Ashlee Cooper of Baylor stands at 6 feet 5 inches, but Lewis said the team has seen players that tall during Mountain West Conference play.

"It's not a factor because players in our conference, Lewis said.

The Horned Frogs are coming off a loss to the Wyoming Cowgirls, while Baylor's last match was a come-from-behind victory over Colorado.

Lewis said playing on the road is a challenge for the Horned Frogs, and they are glad to be back on their FOOTBALL

Penn State player faces allegations

By DANA PENNETT O'NEIL Philadelphia Daily News

ALLENTOWN, Pa. — Ever since Oct. 5, Austin Scott has felt as if he's trapped in a bad movie where the protagonist constantly tries to rewind to that moment, either to prevent what's about to occur or understand how he got

Eighteen days later, the reels are still spinning, with no end and no answers in sight. The only thing the Penn State running back knows for certain is that his life hasn't been the same. What seemed like an unremarkable morning instead was when he learned that a woman who had been in his apartment just hours earlier, a woman he said he had consensual sex with, started the wheels in motion that would end with him facing multiple charges, including felony rape and sexfrom the football team.
