Mr. Amon Carter,
Fort Worth, Texas.

Dear Sir:

There has been executed by the great American sculptor, Enrico Cerrachio, a memorial mask of the late Senator Morris Sheppard, embodying principals of optical illusion that completely revolutionizes works of this nature. As a result of a recent discovery by the sculptor, of a process upon which patent is pending, this work - the first of its kind - reflects a living resemblance of the subject that is remarkable indeed.

After careful consideration, the above committee has selected a number of the leading citizens of Texas, who are financially and intellectually classified to be contributors of \$50.00 each toward the placing of this work, with proper base, in the State Capitol at Austin - the name of each donor to be inscribed on parchment and presented to the wife of the late Senator.

The committee would appreciate an immediate reply, so that a date may be set for the presentation.

All checks are to be made payable to Joseph F. Meyer, Jr., President, Houston National Bank.

Respectfully submitted,
