

ROBERT F. IMBT
PETROLEUM GEOLOGIST
SAN ANGELO, TEXAS

November 3, 1934.

Mr. Oscar E. Monnig,
312 W. Leuda Street,
Ft. Worth, Texas.

Dear Mr. Monnig:

In reply to your letter concerning the fragments of the Pecks Springs meteorite I regret to advise you that I do not have any portion of this at at the present time. I recall as having seen a portion of it in the now distant past but I am certain that I was never given any part of it.

I am not certain as to the location of Pecks Springs. If it is located approximately eight miles west of Odessa in that well known meteorite crater there are chances other fragments may still be obtained there on the ground. If Pecks Springs are anywhere close to Pecks Lake in Midland County I can offer you no additional data as I have never been to that locality.

Sincerely yours,

Robert F. Imbt
