

1957, July 31.

Dear Walter:

I have finally agreed to buy the Admire specimen of some 69 pounds from Mr. Elmer R. Stinson of R. R. 1, Admire, Kansas. I believe you have been holding my \$140.00 check since I sent it to you June 12th. I now add and enclose another one for \$200.00, and Stinson is to get this total of \$340.00 for the specimen delivered to you in good condition.

He wants to know just where you live and how to get there. He plans to come up and see you, bringing the meteorite, "when it rains so I can't work". (If Kansas is like Texas in the summer, that might not be until fall!) Maybe you can arrange for him to phone you before he comes, or maybe you can meet him at the Kansas State College at Manhattan. I leave all that to you, but please let me know that you have informed him and made arrangements.

So far as I am concerned my present idea is to leave the mass there with you at the college in connection with any kind of display you care to make or get up. Will this be satisfactory? Thanks.

I was not unmindful of your appeal for a talk on tape, but I just couldn't get around to the little effort and time it would take. I am sorry because I would have liked to do this for your sake.

Sincerely,
