Mr. H. H. Wininger
American Meteorite Laboratory
Winslow, Arizona

Dear Mr. Wininger:

Last year I got a clue on a meteorite supposed to be on the location of the old B Ranch, about 25 miles northwest of Hereford, Texas, and as I was in Amarillo on some business at one time, I took a day off and went over to check the matter.

The upshot of the matter was that the meteorite apparently was already found several years ago by one H. J. Horwood, who said it weighed about 45 pounds and that he finally sold it to you. Just to satisfy my curiosity I would like to double check this with you, and would like to know under what name and where you list it in your catalogue. I did not find anything under Hereford in your last list.

With kindest regards to all of your family, I am

Yours sincerely,

Oscar E. Monnig
