MONNIG DRY GOODS COMPANY

WHOLESALEERS

P. O. BOX 2200

FORT WORTH 1, TEXAS

1621 MAIN STREET

1. Who was with you when you saw this rock, and tried to move it or break it? Is any such person still living or available?

*My first husband & he is no longer & my daughter
until she was only 3 yrs. of age.*

2. Do you recall whether the rock was near any kind of natural feature, especially a lake or a ridge?

*Yes an artificial lake
was a mile or mile & half north west of rock near E. Howell*

3. Was it near any artificial feature, such as a windmill or a dug tank? (They probably didn't even have any of the latter there at that time!)

*It was near a corner of a fence that
was separated from land from grass land.*

4. Do you remember either the Mr. Clarence Burke, Philip Miller or Joe H. Green mentioned above?

*Burke came from Denton, and
married a Denton girl rather late in life; I think they have been
there only since about 1930 or a little prior. I have no idea
how long Miller has been there. Green came from Navarro County
but has been there since 1901, I think.*

I know none of these people

5. Do you recall a Luke McBrayer who worked for Charlie Williams, one-time manager of the D? Mr. Williams is dad, but Mrs. Williams said McBrayer was one of their best and most observant hands and that I could probably still run him down, if it was possible he would know where the rock was.

*If this Mr. Williams was a young
man was called Bill I knew him well but I
do not know Mr. McBrayer*

6. This is a hard question: from the part of the rock above ground, would you say it was at least as big as a 10 quart bucket or smaller or larger—just the part you saw and remember.

It was large.

*If you could time your trip up there next
year I could get a few days off & could take
you to the exact spot I believe it would be.
More than glad to do so.*

*Respt yours
Mrs. Charlie Williams*
