

September 26, 1952

Mr. Clay Angelo
c/o Fire Department
Hereford, Texas

Dear Mr. Angelo:

As an avocation, I try to collect meteorites, and I have heard from Mrs. Charlie Owen, now working in Vernon, Texas, that she thinks there may be a rock near Hereford that is a meteorite.

She last saw it when she lived on the D Bar ranch, about 1922 or 1923, and recalls it as a large rock on the ground, about 25 miles northeast of Hereford at that time.

She says this land has been broken up into small farms, but at the time she was there, it was about two miles south and a little east of the ranch house, that I think she stayed in.

If you can possibly tell me about where this is or who owns this place now, I would appreciate such information, so I could get in touch with the proper party. A stamped envelope is enclosed for your reply.

Yours sincerely,

OSCAR E. MONNIG
