

Still has meteorite and does not want to part with it. Thinks it may have come from a detonating fireball observed by Jacob Bacckus (sp) who headrighted the Survey he is in and told of a great fireball when he was a child of about 10; this would figure out to about 1879.

Mr. and Mrs. Willie Chandler,  
Allen, Texas.

Dear Mr. and Mrs. Chandler:

It was very pleasant visiting with you a week ago. My wife enjoyed it, too, and was glad to get to meet Mrs. Chandler.

We want to thank you for the onions and lettuce. We took them over to my wife's sister the next evening, where we ate with their mother, Mrs. J. S. Mickle, and they enjoyed this fresh garden food very much. Mrs. Mickle was a Brakefield and I think she was born at Trenton.

I am happy that you have such a nice home and hope you enjoy it for a long time. I certainly think you were wise to rent the place across the way to people you knew and liked. That gives you a nice set-up, if trucks will just quit running off the road!

If I ever get a chance when I am up that way I'll try to see you and we can run over to Denton and see Dr. Carrico together. I think I told you he was head of the Chemistry Department at the university there; I think he still is.

Yours sincerely,

*1971/12/18 Anderson says Mr Chandler was killed by car a few months ago when she crossed the road to market. Walter Young N E of Chandler has also died.*
