

1966, August 26

Mr. Willie Chandler,
Allen, Texas

Dear Mr. Chandler:

I have had your meteorite on exhibit in the Science Building at T. C. U. and upon getting your letter I went there today and got it.

I hate to send something like this thru the mail because it might get lost, and this is important enough scientifically that it ought to be preserved.

I will bring it up to you sometimes within the next few days. It might get to be next week-end, but I'll try to make it sooner, and hope that will be all right with you.

I would still like to have it permanently one of these days, and will talk to you about that when I am there. Thanks for trusting me with it all these years.

Yes, time has dealt kindly with me, and I appreciate your good wishes. I hope you have done all right, and it will be nice to see you again.

Sincerely,
