Mr. Willie Chandler,
Allen, Texas.

Dear Mr. Chandler:

We enjoyed the visit with you a couple of weeks ago. It was a wonderful day for an outing, and you are good company. I am glad we made the trip up to Melissa, too, because even tho Mr. Dobbs did not have a meteorite, he now knows something about what they look like and in his road work he just might accidentally come across one some time.

Some time later on I may phone you and come up there for a day; I have in mind driving around and talking to what few farmers are left and telling them about the subject of meteorites.

We did that once or twice before about the time I met you and I did get another piece of meteorite from a man up near Foot, who had been using it to prop open a chicken coop door! It is a brown rock and probably a piece of some very big ones that were found in that region way back around 1870. I'll phone you one of these days and see if you could go with me. That would help because you probably know the people around there very well.

Thank you for the eggs; they were fine and we really enjoyed them.

Sincerely,

The meteorite is safely in our vault at the store, marked with your name as the finder, and I hope to make arrangements in a few weeks to put it on exhibit for the time being at the Fort Worth Museum of History and Science. Thanks for letting me have it at this time. I'll take good care of it.
