XXXXX 76134

1969, March 10.

Mr. Jose Rocha,  
Inspector de Policia  
H. del Parral,  
Chihuahua, Mexico.

Dear Sir:

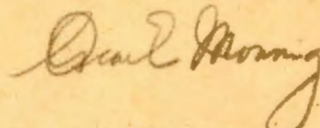

I was very pleased with your letter and the specimens you so kindly obtained and sent. I appreciate your talking to my friend and former neighbor, Mrs. Stella Garza, whom I had phone you. As she told you, I am quite grateful to you and do thank you.

We would be quite interested in getting any more material from this fall of meteorites which you might be able to obtain. I am sending another \$25.00 by international postal money order today. You should receive it shortly. I realize it is expensive and time consuming to make the trip to get these and pay the finders.

It was very interesting to hear that perhaps another larger, main mass had been located. If it is found, I might even come down to see it--not with any thought of getting it, as I assume the scientists in Mexico would want it, but just to view it.

Thank you again for your kind interest. We are willing to take any of the meteorite we can obtain, regardless of size. Those were very nice specimens you sent.

Sincerely,

I am sorry I do not write in Spanish, but you may reply in that language and I can easily get it translated.
