Mr Osceola Morning:

Glad to have your letter of the 5th. Mr De Shazo showed me the rock you have a sample of and it was heavy and well colored thought.

I haven't done anything with the one I have. I believe you told me the National Museum wouldn't pay much for it. so I never answered their letter.

I would be glad to have your offer and I will cooperate in any deal you think we can make. I think I would want to keep the first slice that was cut from it, that would be the smallest but it would also show part of the out side.

A Mr Fredrick C. Leonard from the University of California may also be interested he offered me \$200<sup>00</sup> for it

Truly your  
Dan Long
