

1956, Nov. 30.

Mr. Van Long,
Route 3,
Chickasha, Okla.

Dear Mr. Long:

Well, I guess I'll just have to let the meteorite rest for a while. Thanks for your kind answer.

A bright fireball appeared up your way the evening of November 28th at 9.37 p.m. This was the Wednesday night before Thanksgiving. If any one there saw it I'd appreciate his name and address so that I could write him for his observation. I think the fireball ended over the Davis-Sulphur region and it may have dropped some meteorites there.

Yours sincerely,
