Mr. Oscar Monnig
1016 Morningside Drive
Ft. Worth, Texas

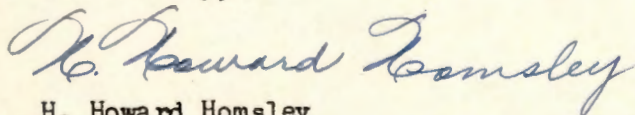

Mr. Monnig;

I read in the Ft. Worth Star-Telegram today that you were attempting to trace the path of a meteor as of Monday afternoon, 7:30 P. M. I am sure I saw this same body racing across the heavens.

I live some 12 miles north east from Haskell. The body I saw was almost exactly north east from my home. I would say that the angle of elevation from my position was 20 to 30 degrees.

I trust this meager information will aid you in establishing the location of the meteor.

Yours truly,

H. Howard Homsley
