Mr Oscar Manning

I am writing you
to tell you I saw ^{that} Meteor and I
seen it from my front yard
and it did not look like it was
as far as Okla it was so plain
we could see flames ~~of~~ of fire coming
from it I seen it when it was so
high I just could see at first
I seen it North east I could see
the flames waving in the air
I thought it was a plain at first
but soon seen was not much
smoke with it, I have been
wondering just what it was
untill I read the file in paper
this morning. My name is
