Dr. Oscar E. Monnig
29 Chelsea Drive
Fort Worth, Texas 76134

Dear Dr. Monnig:

Thank you very much for your letter dated March 30, 1982. I have heard a great deal about you from both Harvey Nininger and Glenn Huss, and am delighted to be in contact with you. I am sorry we were not at home when you were in Scottsdale, but we will have another opportunity to meet.

By the time I received your letter I had distributed all of the Beaver meteorite described in my recent letter to you. Consequently, I sliced the remaining mass of Beaver. The largest slice resulting from this cutting is on its way to you via registered mail. I have enclosed descriptive information regarding the Beaver meteorite in that package. I will send a photograph of the uncut meteorite to you next week.

Will you be attending the Meteoritical Society meeting in St. Louis? If so, I will meet you there. My wife and I will arrive in St. Louis at the end of a long meteorite searching expedition which will take us into North and South Dakota.

Thank you again for your interest and support.

Yours sincerely,

Jim Westcott
