Mr. F. H. Reeder,
124 North Maxey,
Sherman, Texas

Dear Mr. Reeder:

Thanks for your courteous reception when we visited you last Saturday. I'm sorry Mr. Morse left his hat at your home accidentally and that we had to trouble you further.

We think the meteorites fell about where the newspaper said, maybe even a little farther east and north, almost to the Grayson County line or Red River.

We had a little trouble reconciling some of the other observations reported to us with the direction in which you said you saw the light from out on the porch. I do believe the streak you saw the next night (and maybe the one that night) was the Milky Way. You couldn't see it now because of the moonlight, and by the time the moon is gone it will be in a slightly different position.

Thanks, again, for your interest and for the clipping.

Yours sincerely,
