

Sherman TEX  
Wed Sept 13  
1961Dear  
Mr Monnig.

Greetings -

In regards your public  
inquiry; relative to  
meteor over this areaSaturday night Sept 9.  
while watching 10 Pm T.V news,  
no room lights on, I was  
greatly suprised. By an  
extremely illuminated Yard  
and light came in thro  
South window, moving rapidly  
across floor to the north -Sensing the unusual  
I went to front porch in  
time to see Ball of Fire  
as it seemed to splatter  
leaving luminous streak  
South to north. And very  
unmistakenly heard, Several

2

distant sonic booms - to South  
aprox time 10<sup>15</sup> P.m. — —

Have witnessed a number  
of meteors in the Past.  
However - this was of  
greater intensity and was  
with out accompanying  
swishing sound

Incidentally the lighted  
streak was still visible  
Sunday night and appeared  
wider.

Due to its nearness I can  
hardly believe it was a  
meteor - But just what?  
more power to you.

Sincerely

F H Reader.

124 n maver

after repeatedly sweeping  
Front Porch clear of  
Rain Monday and Tuesday  
on the 11th and 12th

Still notice  
Ash like sediment  
grey to Black.

Could have Been washed  
down from Sat night's  
Phenomena
