

1962, July 18

Mr. Gerald . Rowland, Sec.,  
The Meteoritical Society,  
121 No. Greenwood,  
Montebello, Calif.

Dear Mr. Rowland:

I have now discovered the notice of the meeting, but yesterday, at a time when this notice was misplaced, I went ahead in desperation and forwarded my ballot to you at the Long Beach address you use during the winter. I trust it can be retrieved.

In that letter I asked for an extra copy of this notice of the meeting, but you may now ignore that request.

I hope to attend the meeting and will offer a somewhat informal paper—mine are never very academic—on "The Bells, Texas, Meteorites".

If it does not appear too hoggish and is needed for the program, I can perhaps also offer one on "A Probable Small Astrobleme in North Texas".

Abstracts are attached.

Yours sincerely,
