

# THE METEORITICAL SOCIETY

(FORMERLY THE SOCIETY FOR RESEARCH ON METEORITES)  
AN INTERNATIONAL ORGANIZATION, FOUNDED IN 1933, INCORPORATED IN 1935

★ ★ ★

ASSOCIATED WITH THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT  
OF SCIENCE SINCE 1935, AND AFFILIATED WITH IT SINCE 1938

OFFICE OF THE Secretary

8 August 1962

Mr. Oscar E. Monnig  
29 Chelsea Drive  
Fort Worth 15, Texas

Dear Mr. Monnig:

Thanks for your two letters, the ballot, and the abstracts. I am looking forward to hearing, particularly, the paper on "The Bells, Texas, Meteorites." When I read John Russell your abstract, he was amazed, as was I, that seven fragments totalling only about 10 ounces were found. I'd say that's a marvelous piece of sleuthing!

Bells, Tex

As yet the total number of papers for presentation at the meeting is not known, so I don't truthfully know whether to tell you that there will be a dearth or an excess of papers. In any event, there certainly is no objection to your being on the program twice, and I would be very glad to list your other one -- "A Probable Small Astrobleme in North Texas."

I trust that you have received the recent mailing I made to the entire Society. It included the final ballot for officers and councilors for the 1962-66 term, information concerning the meeting and accommodations in Socorro, as well as the paper that Dick Barringer presented at last year's meeting.

I'm looking forward to the meeting, and it will be a pleasure to see you again. My best to you and your wife.

Cordially yours,

*Gerald*

Gerald L. Rowland, Secretary  
The Meteoritical Society  
129 No. Greenwood  
Montebello, Calif.

(Summer  
Address)
