Dr. Edward Olsen  
Field Museum of Natural History  
Chicago, Illinois

Dear Dr. Olsen:

I hope to mail to you today two fragments of the Bells meteorite from the second stone found. While it had been in a torrential rain from Hurricane Carla, these are interior fragments that broke off the original after we collected it, and I do not think they are weathered at all.

Write me the total weight. I hope it is enough for you.

Yours sincerely,

Oscar E. Monnig
