Dear Mr. Morrig

It was nice to be seeing you
again and to meet your friends, and we
are happy that you found another piece
of the meteorite. The boy really enjoyed
chatting with you. Do come back to see us
some time for we want you to feel perfectly
free and we'll come in any searching you
may choose to do here on the farm, and it
will make us happy to help you in any
way we can, so we too, will be on the
give. - and if you would like the
aerial trap, just let me know and I'll
send it on to you.

I was so sorry we were in such a rush
but we had promised the kids an
afternoon up at the Lake, but I'd loved
chatting with you also, for I love that
sort of stuff, and would have enjoyed

hearing your tale of Wonders! I feel
I've read all your little write ups
in the Star Telegram all along - so
you folks come back to see us - and I'll
bake a pot of coffee or tea - and we'll
talk, Astoromy, that is you can
for my cosmic meditations are few
and simple. But you must come back
and tell your tale. We'd love becoming
better acquainted. Maybe your wife
'would come along too?' and that would
be nice, Very, Very nice. asking
The route take China I was ^{asking} telling you
about is the "Goldsella" # 7262 - M.

U. S. Design. Hand painted
Patent # 109894.

This the better grade and the so
beautiful. I do hope you can help
me find this pattern, for I've always
wanted a nice set of dishes, but
was never able to buy them. But now?
Maybe I can? I understand that all

the better grades of china has
brochures for the individual sets,
so maybe you have it there among
your literature? I know all about the
store - that is, I've been there and
use to order a lot of things by mail. It
was all so very satisfactory, always
well, you help me if you can and I
will be so appreciative and do
come back and bring your friends -
just any old time and feel welcome
whenever we are here or not. We like you.

and the story I was telling you
about is "City of World's End" by Edward
Hamilton. It was a pocket edition
and I'm sure that you'd enjoy reading it
my sister wrote me of the book from Los
Angeles. She wrote:-
"This story of 'City of World's End' is not true,
not yet, yet the fact remains that
man to day is playing a dangerous

game with forces beyond her control -
a tantalizing and dramatic guess about
our unguessable future! but Melville, a
sailor on Earth's seas, a man of a century
before our time has quoted "Then shall
We list to no shallow gossip of
Vagellan's and Drake's. Then shall we
give ear to Voyagers whose circum-
navigated the Equiptic; who have rounded
the polar star as Cape Horn." "yet queer
days they must have been with only the
water oceans gone little planet to
venture on". and yet and yet there was
adventure enough in that.

Sounds interesting eh? for already we
have heard a Voyager, telling his tale;
chatting with ~~the~~ earth ~~with~~ ~~feel~~ ~~war~~.
from afar. It's all so very astounding - so
is the ~~old~~ denick on them on the hill! So
wade we feel good when you give us your
blessing. you must be a wonderful soul!
so we wish you well, also in everything.
yours
The J.B. Washburns
