# STRONGBARN

## Corrugated Galvanized Steel Roofing and Siding

**STRONGBARN** is the strongest corrugated galvanized steel roofing and siding sheet on the market. You'll find it is stronger than ordinary 28 gage; equal in strength to 26 gage, yet 21 lbs. per square lighter in weight.

**STRONGBARN** has a 1.25 oz. zinc coating (manufactured to ASTM specification A-361), which assures you of long service life.

**STRONGBARN** is your best buy, because it offers greater strength, long life, and is attractively priced—the three most important considerations in your selection of roofing and siding material.
