Dear Mr. Monnig,

Please forgive my tardiness in answering your letter as the Christmas season has had me quite busy. Mr. Butler was glad that I made your acquaintance and sends his regards. They are all quite well. He has told me quite a bit about you and your observatory.

I am sorry to report that I could not acquire the meteorite for your examination. I even offered to send it registered mail but they would not part with it. I will send you a color photo as soon as my camera is out of repair.

Santa Clause was quite good to me this year. I recieved a Criterian frequency converter and a turrent eyepiece holder. I am very pleased with the converter. The change of frequency is not too rash and a rough adjustment allowed me to correct an errow in my drive system.

I recently conducted a meteor count for the Ursid shower. I had cooperation over a two-hundred mile area. The charts are still coming back and I believe that the results will prove very interesting.

I am enclosing a copy of Gaz-Gazz, a magazine that our club publishes. My new observatory is featured this month and I am very proud of it.

I found your phamplet on metoerites very, very informative. If you could send me about thirty copies for my fellow club members, I will be happy to pay you for them. Is this possible?

Afraid that I must close for now and get back to work.

Your Friend,

Mike Czakowski
