

1968, July 15

Dr. E. P. Henderson,
Smithsonian Institution,
U. S. National Museum,
Washington, D. C. 20560

Dear Dr. Henderson:

Please check your files on the Boaz, Alabama, meteorite. I think this has never been settled. The last correspondence I find in my files is a letter from me to you 1958 Sept. 9, and I sent you a copy of that April 5, 1968, but don't think you acted on it.

This was an iron meteorite that was badly decomposing and you were kindly nursing it for me, but I think there a general plan that I was to exchange a slice with you and get the rest back.

Let us please bring this to a conclusion, or if you have and I am wrong, please let me know. I hope to see you at Cambridge this fall, but let's don't wait till then!

Sincerely,

Orin M. ...
