

1956 Feb. 3.

Mr. C. C. Pinckney,
P. O. Box 2228,
Birmingham 1, Ala.

Dear Mr. Pinckney:

I was delighted to get your card and see that you had visited Washington and been to visit Henderson. I trust you got to see the slices of the Boaz iron, one of which will finally come to you. I told Henderson it was all right with us for them to take their time in the cutting and studying.

I appreciate greatly your continually renewed invitation to come over there for the further work on this that I had proposed, but I am leaving for New York this afternoon and will be gone till near mid-month. We are having atrocious weather just now and I am afraid it is extending to your region, too.

So, with regret, I must postpone it again. I'll try to write when I get back home. I got a beautiful picture of a meteor the night of January 1--in color on Ektachrome. It is only a 35 mm. film, and nobody reported the meteor to me, nor did I see it. I am trying to have some duplicates made.

Sincerely,
