OSCAR E. MONNIC

1955, April 7.

The Pacific Museum,
Box 100,
Shell Beach, Calif.

Gentlemen:

Thank you for your answer to my card inquiring about a meteorite which I understood you were offering for sale. I since have a copy of your circular listing it as a "meteorite section, Allagheny Fall, 1" x 4" x 7", rough surface, \$25.00".

There is no recorded "Allagheny Fall" and I wonder if you refer to "Allegan, Mich." This is a soft, crumbly gray stone with black crust.

I am also interested in the Australian stoney meteorite you mention, and ask for specific, detailed information.

I am at present interested only in meteorites and wish to ask for any accurate information you can give me on what you have to offer in that line. Would you submit several on approval if I put up a deposit?

A stamped envelope is enclosed for further specifications. I think I can buy some of these from you but need this information, and hope you will favorably consider my request for an approval arrangement.

Sincerely yours,

Oscar Monnic

Write again 4/9

Dear Sir:

We have decided to keep the stoney meteorite. The Allegan item was in father's collection and h'd had it for many years. Is quite rough as if it had been in the ground many years. I have no further information on it.

Yours,

A. Brown
