Dear Oscar:

I have just received a copy of the 1947 Sep. issue of Texas Observers' Bulletin. (Why it is so late, I do not know.) In it I have read with interest your article about Mr. H. O. Stockwell of Hutchinson, Kansas, and "Some Real Meteorite Finds," and I am wondering whether I might reprint that article, with your "By-line," in CMS, since I am sure that it would be of a great deal of interest to many of our readers. I should like to reproduce the photograph too and should like to have you furnish me with an appropriate legend for it. A number of dates occur in the article (month and day only). To what year do these dates belong? Since they extend from Sep. 19 to Nov. 2, and since the issue of the Bulletin in which they appear is for 1947 Sep., it is difficult to see how they can be for the current calendar year (1947). Will you please clarify this point?

I shall appreciate a reply by ^{return} airmail, inasmuch as I may decide to use the forenamed article, if I may, in the Jan., 1948, instalment of CMS, material for which should be forwarded to the printer tomorrow (Dec. 1), if possible. Kindly use my home address until further notice, since I am at present on sabbatical leave from the University and prefer to have my mail sent here.

I am glad to know that Mr. Stockwell is a member of the MS; he certainly ought to be, in view of his record of meteorite discoveries!

With best wishes, I am

Cordially yours,
