Mr. Oscar E. Monnig
29 Chelsea Drive
Fort Worth, Texas 76115

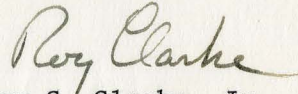

Dear Mr. Monnig:

Ed Henderson is out of the country again. This time he is in Japan and will be gone at least six weeks. Just before leaving he asked me to send you the enclosed copy of Oliver Schaeffer's letter about the Tishomingo meteorite. As I understand it, Schaeffer does not know that you are the source of material he worked on.

Since Ed left, your letter of 7 March and card of 10 March have arrived. I found two slides on Ed's desk that were marked as belonging to you, and they are also enclosed in this letter. Were there others? I could look further but make no promises.

Your letter and card will be held for Ed's return. If there is anything I can do in the interim, please let me know.

Sincerely yours,

Roy S. Clarke, Jr.
Associate Curator
Division of Meteorites
