

1971, April 13

Mr. Glen Orr,  
Route 2  
Tishomingo, Oklahoma

Dear Glen:

Your parents paid us a surprise visit the other day and I was delighted to see them and their neighbors--Mr. and Mrs. Lovett, if I got the name right. I am sorry I could not spend more time with them or do more for them.

They said you wanted a piece back for a special exhibit to be held there next summer one day. As I understood your dad, he referred to the  $5\frac{1}{2}$  pound piece that you once let me send to Washington for verification of their tests when they were worried whether this was really a meteorite.

I find they returned this to me March 9, 1966 and my files indicate I brought it back to you March 26th. You should have it there, but please let me know.

Now if you were referring to the original small piece of about 2 lbs. 6 oz., that I had out, I know that at least half of this is still in Washington, but I am a bit confused about the other half. Did I return it to you?

I wrote Dr. Henderson Feb. 24 that I wanted back whatever material he still had, but had not heard from him; I'll write him again today. Meanwhile let me know whether you have the  $5\frac{1}{2}$  pound piece and whether you have half of the little piece. Thanks.

I hear you are going to get married and extend my congratulations. Will Ricky be the best man at the wedding? I hope to visit up there some week end soon.

Sincerely,
