Ada, Okla. 525 E Main

Dear Sir: In regard to the meteorite which we are using for a paper weight---from reading your pamphlet I feel sure it is a meteorite however we picked it up as a Rock, do not remember when or where. We just always pick up rocks when we are on trips. This one is small about  $1\frac{1}{2}$  x  $2\frac{1}{2}$  sorta square like, heavy for its size.

Sincerely,  
R.B.Evans Candy Co.
