Mr. Oscar E. Monnig
29 Chelsea Drive
Fort Worth, Texas

Dear Oscar:

Enclosed are two prints showing different views of the Tishomingo, Oklahoma, meteorite. I hope by this date the dear little thing is resting in your loving hands. Also, I hope that you have managed to make that Oklahoma gentleman realize that he is doing something for this "great society" by letting us acquire that iron.

These pictures will show you that this slice is large enough to permit being sliced, making two equal halves, and ending up with a sizable polished section. You should see one I just got from Russia, which has structures that may be of the same general nature, but not the equal to this Tishomingo.

I will not be troubling you for a few weeks, but if Roy Clark can do anything while I am away, call on him because we are all keyed up over this find.

Kindest personal regards.

Cordially yours,

Ed.
