Fort Worth, Texas 76115

Dear Oscar:

Congratulations on the two large irons from Oklahoma. Next to getting them for our collection I enjoy seeing your collection grow.

Are these separate irons or two individuals of the same fall? One good way to find out, is to let us cut a section and give you the information so you can get out a description of these. How about doing a job with us?

About the Venus stone, all I have is a note on the cards that you were going to supply information. Venus is in Johnson County so I can put a dot on the map, but I don't know if it's a find or fall. I have it listed as a stone. Brian Mason has no information on this either.

We again offer our services in typing the meteorite if we can get enough to make a good thin section. How about it?

Enclosed is a copy of all the meteorites we know about in Oklahoma. I certainly need the data on your two new irons.

With kindest personal regards, I remain

Cordially yours,

E. P. Henderson
Curator
Division of Meteorites
