

1981, May 12

Mr/ Elo Wunderlich,
Box 115
Yorktown, TX 78164

Dear Elo:

I hope all goes well with you. Bob and I are still kicking, but I sold our family business in May of 1980 and have been very busy with that efforts and resulting income taxes!

I'm just now sort of catching my breath in retirement, but my eyes have failed me badly. I do not think we ever adequately checked the sample you submitted way back there, so I still have the material before me. Could you possibly send me a slightly larger piece of it, as intact as possible?

I am checking all of our meteorites and I need to know just where you got the Davy meteorite that was so badly broken up. Could you mark the locality of find on the enclosed map and return it to me?

Then we have another source that I think we got from you, found by Ramond Kyrisch as I now recall. Can you mark the location of his find on this map? If you need the map of some adjoining county let me know.

Thanks again for your help. Our association has been a source of great satisfaction to me, and I hope to you.

You probably know there was a stony meteorite found near Cuero some years ago and an iron from Yorktown, both in the possession of the University of Texas. So there have been a lot of meteorites found in our vicinity!

Thank you very much.

Sincerely,
