

RAILWAY MAIL SERVICE

Monday Aug 5 \_\_\_\_\_, 1940  
(Place) (Date)

Dear Oscar,-

Herewith list of the various weights of the Davy meteorite.

No others have bobbed up.

The weather has been nice and warm.

Best regards

Walter Weiss.

The Davy Meteorite.

July 26, 1940.

		89 - 9	Total
<hr/>	65-210		
	or 78- 2		

All the various pieces are numbered, so it is easy to get one of a certain weight. To designate the ones that fit into each other, I gave them the same letter, number plus letter. Up to now only "two couples" match. I have carbon copy of this.
